HAVE IN COMMON

Publish Own Book

Many Internet Millionaires surveyed usually would go on to publish their own physical book to reach the offline market.

Have Membership Sites

According to Mike Filizino, 40% of the online marketers who make \$10,000 a month and above have their own product, or membership site or both.

Have a List

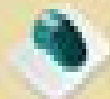

All online marketers who are generating a 5 figure monthly income have a mailing list of their own.

Run Own Seminar

At the pinnacle of the information publishing business, when working from home or a random Starbucks outlet proves too small to house the growing business, Internet entrepreneurs typically abandon the 'ret cool' lifestyle to go into this demanding phase.

Outsource

While majority of the Internet Millionaires do not run a conventional office, most rely on outsourcing their day-to-day operations to virtual assistants in countries such as Philippines and India.

Joint Venture

This is followed that while you can go into business alone, you cannot reach the start by working alone!

Wegerif,2013-01-04 Dialogic Education for the Internet Age argues that despite rapid advances in communications technology most teaching still relies on traditional approaches to education built upon the logic of print and dependent on the notion that there is a single true representation of reality In practice the use of the Internet disrupts this traditional logic of education by offering an experience of knowledge as participatory and multiple This new logic of education is dialogic and characterises education as learning to learn think and thrive in the context of working with multiple perspectives and ultimate uncertainty The book builds upon the simple contrast between observing dialogue from an outside point of view and participating in a dialogue from the inside before pinpointing an essential feature of dialogic the gap or difference between voices in dialogue which is understood as an irreducible source of meaning Each chapter of the book applies this dialogic thinking to a specific challenge facing education re thinking the challenge and revealing a new theory of education Areas covered in the book include dialogical learning and cognition dialogical learning and emotional intelligence educational technology dialogic spaces and consciousness global dialogue and global citizenship dialogic theories of science and maths education The challenge identified in Wegerif s text is the growing need to develop a new understanding of education that holds the potential to transform educational policy and pedagogy in order to meet the realities of the digital age Dialogic Education for the Internet Age draws upon the latest research in dialogic theory creativity and technology and is essential reading for advanced students and researchers in educational psychology technology and policy **Creating Web Sites**
