*Prophecy, Behaviour and Change* Gerald G. Smale, 2019-03-04 Professional helpers may harm their clients instead of helping them This is one of the important implications for the selection training and practice of members of the helping professions of the evidence reviewed in this book Originally published in 1977 Gerald Smale argues that the expectations of the professional helper whether social worker doctor psychiatrist psychoanalyst psychotherapist or counsellor can act as self fulfilling prophecies on his or her clients for better or worse In order to suggest how the expectations of the helper might operate the author examines a three stage model of self fulfilling prophecies The stages are the prophecy behaviour based upon the prophecy the outcome brought about by the behaviour Extensive evidence from the fields of experimenter bias hypnosis and placebo medicine psychotherapy casework and counselling research is reviewed and related to the model and the relationship between this analysis and labelling theory is discussed The book demonstrates that it is the behaviour of the worker towards the client which is of crucial importance and proposes that the client's future and his or her personal strengths should be an important focus of the helping relationship Finally it outlines the dangers of negative expectations and emphasises the ways in which expectations can be used to optimum effect **SELF-FULFILLING PROPHECY.**, 1994

Insel, Lenore Jacobson, 1975 **Self-Fulfilling Prophecy** Robert T. Tauber, 1997-02-25 What we expect all too often is exactly what we get Nowhere is this more true than in education where teachers expectations of students are crucial The self fulfilling prophecy should be of great interest to teachers both those in training and those in service Whether or not a teacher is aware of it the self fulfilling prophecy is at work impacting students either to their benefit or their detriment It follows that teachers should be made aware of the SFP and how it can be used effectively in education Using the new on line research facilities Dr Tauber has compiled over 700 doctoral dissertations and countless journal articles on stereotyping perception of social differences race gender ethnicity body features age socioeconomic levels special needs and other personal and situational factors The last part of the book presents a collection of testimonials written from the viewpoint of practitioners *The Self-fulfilling Prophecy* Robert King Merton, 1999 **Phenomenal** Jeff Bollow, 2011-11-11 [The Corsini Encyclopedia of Psychology and Behavioral Science, Volume 4](#) W. Covington, 1998 This book introduces the basic principles of motivation as they apply to classroom learning and management in a readable non technical form Covington argues against the popular notion that the problems existing in schools today stem primarily from a lack of student motivation Instead he asserts that students are motivated sometimes even overly motivated but often for the wrong reasons Traditional teaching methods including conventional grading procedures and an emphasis on competition can contribute to student demoralization and Covington identifies the ways in which students respond to misguided incentives For some students motivation is directed at avoiding failure by avoiding participation For others demoralization leads to withdrawal from an educational system that they believe to be irrelevant to their lives Still other students are driven to prove their worth by outperforming fellow students The book suggests practical concrete ways that teachers can use classroom incentives to inspire a desire to learn      **Self-Fulfilling Prophecies** Russell A. Jones, 2025-03-03 Originally published in 1977 *Self Fulfilling Prophecies Social Psychological and Physiological Effects of Expectancies* integrates a wide variety of research and theory dealing with inter and intrapersonal expectancies from which the author develops a new theoretical model The model explores the relationships between a person's expectation of success and both the objective probability of success and the effort expended in pursuit of the goal The author also explores in detail

the interdependence of one's interpersonal expectancies as in implicit personality theories stereotypes and the labeling approach to deviant behavior and an individual's personal goals With the development of the theoretical model the author critically reviews the literature on performance and goal seeking behavior at the time Finally the influences of expectancies on susceptibility to illness placebo effects and psychosomatic disease are discussed This will be a volume of interest to all concerned with human motivation and goal seeking behavior and today can be read in its historical context
