Henry F. Carey, Oliver P. Richmond

Selfish Altruist Relief Work In Famine And War:

The Selfish Altruist Tony Vaux, 2013-06-17 Provides an analysis of some of the most traumatic situations involving famine and war of the last two decades helping us to understand what it takes to be an aid worker and how important humanitarian action is today Famine and war evoke strong emotional reactions and for most people there is a limited amount they can do But the relief worker has to convert emotional responses into practical action and difficult choices whom to help and how Their own feelings have to motivate action for others But can they separate out their own selfish feelings and prejudices in such an emotive climate How do they avoid being partial among those they are helping Are they motivated by altruistic concern or the power they experience or the attention they receive Tony Vaux brings over 20 years experience as one of Oxfam's leading emergency managers to the exploration of the conflicts between subjective impulses and objective judgements and the dilemmas relief workers contend with

The Selfish Altruist Tony Vaux, 2001 Humanitarianism in Question Michael Barnett, Thomas G. Weiss, 2012-05-15 Years of tremendous growth in response to complex emergencies have left a mark on the humanitarian sector Various matters that once seemed settled are now subjects of intense debate What is humanitarianism Is it limited to the provision of relief to victims of conflict or does it include broader objectives such as human rights democracy promotion development and peacebuilding For much of the last century the principles of humanitarianism were guided by neutrality impartiality and independence More recently some humanitarian organizations have begun to relax these tenets The recognition that humanitarian action can lead to negative consequences has forced humanitarian organizations to measure their effectiveness to reflect on their ethical positions and to consider not only the values that motivate their actions but also the consequences of those actions In the indispensable Humanitarianism in Question Michael Barnett and Thomas G Weiss bring together scholars from a variety of disciplines to address the humanitarian identity crisis including humanitarianism's relationship to accountability great powers privatization and corporate philanthropy warlords and the ethical evaluations that inform life and death decision making during and after emergencies

Shaping the Humanitarian World Peter Walker, Daniel G.

Maxwell,2014-08-07 Origins of the international humanitarian system Mercy and manipulation in the Cold War The globalization of humanitarianism from the end of the Cold War to the global war on terror States as responders and donors International organizations NGOs and private action A brave new world a better future **The Politics of International Political Theory** Mathias Albert,Anthony F. Lang Jr.,2018-08-13 This book assesses the impact of the work of Chris Brown in the field of International Political Theory The volume engages with general issues of IPT as well as basic issues such as the use and role of practical reasoning and presents a nuanced understanding about issues regarding the legitimacy of war and violence It explores questions that pertain to human rights morality and ethics and generally an outlook for devising a better world The project is ideal for audiences with interest in International Relations Ethics and Morality Studies and International Political Theory **Mitigating Conflict** Henry F. Carey,Oliver P. Richmond,2004-08-02 Drawing upon the writings of academics and activists this collection explores the roles that have emerged for NGOs as they have engaged more with peacekeeping and peacebuilding initiatives in various locations around the world **Today We Drop Bombs, Tomorrow We Build Bridges** Peter Gill,2016-05-15 An indispensable inquiry into our moral health and humanity LSE Review of Books The war on terror has politicised foreign aid as never before Aid workers are being killed at an alarming rate and civilians in war torn countries abandoned to their fate From the ravaged streets of Mogadishu to the unending struggle in Helmand Peter Gill travels to some of the most conflict stricken places on earth to reveal the true relationship between the aid business and Western security While some agencies have clung to their neutrality against ever stiffer odds others have compromised their impartiality to secure the flow of official funds In a world where the advance of Islamic State constitutes the gravest affront to humanitarian practice and principle the aid community has faced in decades Gill poses the crucial question can Western nations fight in a country and aid it at the same time *Humanitarianism* Tim Allen,Anna Macdonald,Henry Radice,2018-06-27 The field of humanitarianism is characterised by profound uncertainty by a constant need to respond to the unpredictable and by concepts and practices that often defy simple or straightforward explanation Humanitarians often find themselves not just engaged in the pursuit of effective action but also in a quest for meaning That is the starting point for this book Humanitarian action has in recent years confronted geopolitical challenges that have upended much of its conventional modus operandi and presented threats to its foundational assumptions and legal frameworks The critical interrogation of the purpose practice and future of humanitarian action has yielded a rich new field of enquiry humanitarian studies and many thoughtful books articles and reports So the question arose as to the most useful way to provide a critical overview that might serve to bring some definitional clarity as well as analytical rigor to the waves of critique and shifting sands of humanitarian action Humanitarianism A Dictionary of Concepts provides an authoritative analysis that attempts to rethink rather than merely problematize or define the issues at stake in contemporary humanitarian debates It is an important moment to do so Just about every tenet of humanitarianism is currently open to question as never

The New Humanitarians in International Practice Zeynep Sezgin, Dennis Dijkzeul, 2015-12-14 As humanitarian needs continue to grow rapidly humanitarian action has become more contested with new actors entering the field to address unmet needs but also challenging long held principles and precepts This volume provides detailed empirical comparisons between emerging and traditional humanitarian actors It sheds light on why and how the emerging actors engage in humanitarian crises and how their activities are carried out and perceived in their transnational organizational environment It develops and applies a conceptual framework that fosters research on humanitarian actors and the humanitarian principles In particular it simultaneously refers to theories of organizational sociology and international relations to identify both the structural and the situational factors that influence the motivations aims and activities of these actors and their different levels of commitment to the traditional humanitarian principles It thus elucidates the role of the humanitarian principles in promoting coherence and coordination in the crowded and diverse world of humanitarian action and discusses whether alternative principles and parallel humanitarian systems are in the making This volume will be of great interest to postgraduate students and scholars in humanitarian studies globalization and transnationalism research organizational sociology international relations development studies and migration and diaspora studies as well as policy makers and practitioners engaged in humanitarian action development cooperation and migration issues

The Endtimes of Human Rights Stephen Hopgood, 2013-11-18 We are living through the endtimes of the civilizing mission The ineffectual International Criminal Court and its disastrous first prosecutor Luis Moreno Ocampo along with the failure in Syria of the Responsibility to Protect are the latest pieces of evidence not of transient misfortunes but of fatal structural defects in international humanism Whether it is the increase in deadly attacks on aid workers the torture and disappearing of al Qaeda suspects by American officials the flouting of international law by states such as Sri Lanka and Sudan or the shambles of the Khmer Rouge tribunal in Phnom Penh the prospect of one world under secular human rights law is receding What seemed like a dawn is in fact a sunset The foundations of universal liberal norms and global governance are crumbling from *The Endtimes of Human Rights* In a book that is at once passionate and provocative Stephen Hopgood

argues against the conventional wisdom that the idea of universal human rights has become not only ill adapted to current realities but also overambitious and unresponsive A shift in the global balance of power away from the United States further undermines the foundations on which the global human rights regime is based American decline exposes the contradictions hypocrisies and weaknesses behind the attempt to enforce this regime around the world and opens the way for resurgent religious and sovereign actors to challenge human rights Historically Hopgood writes universal humanist norms inspired a sense of secular religiosity among the new middle classes of a rapidly modernizing Europe Human rights were the product of a particular worldview Western European and Christian and specific historical moments humanitarianism in the nineteenth century the aftermath of the Holocaust They were an antidote to a troubling contradiction the coexistence of a belief in progress with horrifying violence and growing inequality The obsolescence of that founding purpose in the modern globalized world has Hopgood asserts transformed the institutions created to perform it such as the International Committee of the Red Cross and recently the International Criminal Court into self perpetuating structures of intermittent power and authority that mask their lack of democratic legitimacy and systematic ineffectiveness At their best they provide relief in extraordinary situations of great distress otherwise they are serving up a mixture of false hope and unaccountability sustained by human rights as a global brand The Endtimes of Human Rights is sure to be controversial Hopgood makes a plea for a new understanding of where hope lies for human rights a plea that mourns the promise but rejects the reality of universalism in favor of a less predictable encounter with the diverse realities of today s multipolar world

You're History! Michelle P. Brown, Richard J. Rouchdy, Iman A. Hamdy, 2017-10-01 In recent years the food question has been a central concern for politicians economists international organizations activists and NGOs alike as well as social scientists at large This interest has emerged from the global food crisis and its impact on the environment and the political economy and security of the global south as well as the expansion of scholarly studies relating food issues to agrarian questions with the objective of developing theoretical frameworks that would allow for a critical analysis of the current food issues at historical cultural social political and economic levels In this context Cairo Papers organized its 2016 symposium around the food question in the Middle East Papers in this collection address the food question from both its food and agricultural aspects and approach it as the site of political and economic conflicts as the means of sociocultural control and distinction and as the expression of national and ethnic identities Contributors Ellis Goldberg Saker ElNour Hala Barakat Khaled Mansour Malak S Rouchdy Habib Ayeb Christian Handerson Sara Pozzi and Sara El Sayed **The Politics of Aid to Burma** Anne Decobert, 2015-11-19 For over sixty years conflict between state forces and armed ethnic groups was ongoing in parts of the borderlands of Burma Ethnic minority communities were subjected to systematic and widespread abuses by an increasingly complex patchwork of armed state and non state actors Populations in more remote and disputed border areas typically had little to no access to even basic healthcare and education

services As part of its counter insurgency campaign the military state also historically restricted international humanitarian access to civilian populations in unstable border areas It was in this context that cross border aid to Burma had developed as an alternative mechanism for channelling assistance to populations denied aid through more conventional systems Yet by the late 2000s national and international changes had significant impacts on an aid debate which had important political and ethical implications Through an ethnographic study of a cross border aid organisation working on the Thailand Burma border this book focuses on the political and ethical dilemmas of humanitarian government It explores the ways in which aid systems come to be defined as legitimate or illegitimate humanitarian or un humanitarian in an international context that has witnessed the multiplication of often conflicting humanitarian systems and models It examines how an embodied history of violence can shape the worldviews and actions of local humanitarian actors as well as institutions created to mitigate human suffering It goes on to look at the complex and often invisible webs of local organisations international NGOs donors armed groups and other actors which can develop in a cross border and extra legal context a context where competing constructions of systems as legitimate or illegitimate are highlighted Exploring the history of humanitarianism from the local aid perspective of Burma this book will be of interest to students and scholars of Southeast Asian Studies Anthropology of Humanitarian Aid and Development Studies Even in Chaos Kevin M.
