Selves People And Persons:

Self-Determination of Peoples Antonio Cassese, 1995 The self determination of peoples is a major issue in the world community both radical and subversive it serves to grant statehood to oppressed peoples but also to disrupt existing State structures This book the first comprehensive legal account sets out to trace how this political ideal has turned into an international legal standard Scrutinising State practice through national digests and UN proceedings the author pinpoints the limits within which this political postulate has gained a foothold in the body of international law and assesses the extent to which it has had an impact on existing legal norms This is primarily a legal inquiry which however looks at law within its historical and political context and given its judicial underpinning makes an important contribution to the study of the interplay of law history and politics in international relations

The Curse of the Self Mark R. Leary, 2007 Although the capacity for self awareness is an essential aspect of human nature self reflection comes at a high price Self awareness and its accompanying egoism profoundly affect people s lives interfering with their success polluting their relationships with other people and undermining their happiness Drawing from work in psychology and other behavioral sciences in *The Curse of the Self* Mark Leary explores personal and social problems that are created by the human capacity for self reflection and offers insights regarding how these problems may be minimized

Peoples and International Law James Summers, 2007-08-13 Peoples and International Law is the most comprehensive current account of the right of self determination in international law The book examines the law of self determination as the product of the interaction between nationalism and international law This broad and interdisciplinary work charts this interaction through different aspects of the legal process in international instruments judicial decisions legal obligations and historical context critically and in extensive detail The book is essential reading for those with an interest both in peoples rights in international law and the study of nationalism

Embodied Selves and Divided Minds Michelle Maiese, 2016 Embodied Selves and Divided Minds examines how research in embodied cognition and enactivism can contribute to our understanding of the nature of self consciousness the metaphysics of personal identity and the disruptions to self awareness that occur in case of psychopathology It begins with the assumption that if we take embodiment seriously then the resulting conception of the self as physically grounded in the living body can help us to make sense of how a minded subject persists across time However rather than relying solely on puzzle cases to discuss diachronic persistence and the sense of self this work looks to schizophrenia and dissociative identity disorder as case studies Here we find real life examples of anomalous phenomena that signify disruptions to embodied self experience and appear to indicate a fragmentation of the self However rather than concluding that these disorders count as genuine instances of multiplicity the book s discussion of the self and personal identity allows us to understand the characteristic symptoms of these disorders as significant disruptions to self consciousness The concluding chapter then examines the implications of this theoretical framework for the clinical treatment of schizophrenia and dissociative identity

disorder Embodied Selves and Divided Minds reveals how a critical dialogue between Philosophy and Psychiatry can lead to a better understanding of important issues surrounding self consciousness personal identity and psychopathology

Expressing the Self Minyao Huang, Katarzyna Jaszczolt, 2018 This book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume's focus on expressing the self however is not directly motivated by an interest in the grammar or lexicon but instead stems from philosophical discussions on the special status of thoughts about oneself known as de se thoughts It is this interdisciplinary understanding of

expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other This unprecedented juxtaposition results in a novel method of approaching de se and de se expressions in which research methods from linguistics and philosophy inform each other The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science
