**Heart- and Soul-Like Constructs across Languages, Cultures, and Epochs** Bert Peeters, 2019-01-14 All languages and cultures appear to have one or more mind like constructs that supplement the human body Linguistic evidence suggests they all have a word for someone and another word for body but that doesn't mean that whatever else makes up a human being i.e. someone apart from the body is the same everywhere Nonetheless the Anglo mind is often reified and thought of in universal terms This volume adds to the literature that denounces such reification It looks at Japanese Longgu an Oceanic language Thai and Old Norse Icelandic spelling out in a culturally neutral Natural Semantic Metalanguage NSM how the mind like constructs in these languages differ from the Anglo mind

*Cross-linguistic Semantics* Cliff Goddard, 2008 Cross linguistic semantics investigating how languages package and express meanings differently is central to the linguistic quest to understand the nature of human language This set of studies explores and demonstrates cross linguistic semantics as practised in the natural semantic metalanguage NSM framework originated by Anna Wierzbicka The opening chapters give a state of the art overview of the NSM model propose several theoretical innovations and advance a number of original analyses in connection with names and naming clefts and other specificational sentences and discourse anaphora Subsequent chapters describe and analyse diverse phenomena in ten languages from multiple families geographical locations and cultural settings around the globe Three substantial studies document how the metalanguage of NSM semantic primes can be realised in languages of widely differing types Amharic Ethiopia Korean and East Cree Each constitutes a lexicogrammatical portrait in miniature of the language concerned Other chapters probe topics such as inalienable possession in Koromu Papua New Guinea epistemic verbs in Swedish hyperpolysemy in Bunuba Australia the expression of momentariness in Berber ethnogeometry in Makasai East Timor value concepts in Russian and virtuous emotions in Japanese This book will be valuable for linguists working on language description lexical semantics or the semantics of grammar for advanced students of linguistics and for others

interested in language universals and language diversity      Semantic Intelligence Sarika Jain,Sven Groppe,Bharat K. Bhargava,2023-03-31 This book constitutes refereed proceedings of the 2nd International Semantic Intelligence Conference ISIC 2022 This book covers a wide range of topics including semantic web engineering ontology based data access multimodal and multilingual access machine to machine communications and interoperability knowledge extraction and ontology learning from the web computational paradigms and computational intelligence distributed and mobile systems and many others This book includes novel contributions and the latest developments from researchers across industry and academia This book serves as a valuable reference resource for academics and researchers across the globe      *Culture, Body, and Language* Farzad Sharifian,René Dirven,Ning Yu,Susanne Niemeier,2008-11-03 One of the central themes in cognitive linguistics is the uniquely human development of some higher potential called the mind and more particularly the intertwining of body and mind which has come to be known as embodiment Several books and volumes have explored this theme in length However the interaction between culture body and language has not received the due attention that it deserves Naturally any serious exploration of the interface between body language and culture would require an analytical tool that would capture the ways in which different cultural groups conceptualize their feelings thinking and other experiences in relation to body and language A well established notion that appears to be promising in this direction is that of cultural models constituting the building blocks of a group s cultural cognition The volume results from an attempt to bring together a group of scholars from various language backgrounds to make a collective attempt to explore the relationship between body language and culture by focusing on conceptualizations of the heart and other internal body organs across a number of languages The general aim of this venture is to explore a the ways in which internal body organs have been employed in different languages to conceptualize human experiences such as emotions and or workings of the mind and b the cultural models that appear to account for the observed similarities as well as differences of the various conceptualizations of internal body organs The volume as a whole engages not only with linguistic analyses of terms that refer to internal body organs across different languages but also with the origin of the cultural models that are associated with internal body organs in different cultural systems such as ethnomedical and religious traditions Some contributions also discuss their findings in relations to some philosophical doctrines that have addressed the relationship between mind body and language such as that of Descartes      The Life of the Mind in Old English Poetry Antonina Harbus,2021-11-15 Ideas about the human mind are culturally specific and over time vary in form and prominence The Life of the Mind in Old English Poetry presents the first extensive exploration of Anglo Saxon beliefs about the mind and how these views informed Old English poetry It identifies in this poetry a particular cultural focus on the mental world and formulates a multivalent model of the mind behind it as the seat of emotions the site of temptation the container of knowledge and a heroic weapon The Life of the Mind in Old English Poetry treats a wide range of Old English literary genres in the context of their Latin sources and

analogues where applicable in order to discover how ideas about the mind shape the narrative didactic and linguistic design of poetic discourse Particular attention is paid to the rich and slippery vernacular vocabulary for the mind which suggests a special interest in the subject in Old English poetry The book argues that Anglo Saxon poets were acutely conscious of mental functions and perceived the psychological basis not only of the cognitive world but also of the emotions and of the spiritual life

*Advances in Cultural Linguistics* Farzad Sharifian, 2017-05-02 This groundbreaking collection represents the broad scope of cutting edge research in Cultural Linguistics a burgeoning field of interdisciplinary inquiry into the relationships between language and cultural cognition The materials surveyed in its chapters demonstrate how cultural conceptualisations encoded in language relate to all aspects of human life from emotion and embodiment to kinship religion marriage and politics even the understanding of life and death Cultural Linguistics draws on cognitive science complexity science and distributed cognition among other disciplines to strengthen its theoretical and analytical base The tools it has developed have worked toward insightful investigations into the cultural grounding of language in numerous applied domains including World Englishes cross cultural intercultural pragmatics intercultural communication Teaching English as an International Language TEIL and political discourse analysis
