To the Maginot Line Judith M. HUGHES, Judith M Hughes, 2009-06-30 The decision to fortify northeastern France has usually been considered a

tragic mistake an example of bad planning and missed opportunities Not so says Judith M Hughes who provides a convincing view of how France's military and political leaders tried to safeguard their nation and why they failed As critic Michael Hurst writes in *The American Historical Review* The trends of French interwar history are deftly carried through onto these pages with an unobtrusive lucidity and persuasiveness *Makers of Modern Strategy from Machiavelli to the Nuclear Age* Peter Paret, Gordon A. Craig, Felix Gilbert, 2010-10-01 Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present *Makers of Modern Strategy from Machiavelli to the Nuclear Age* takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are repinted from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past **Conventional**

Deterrence John J. Mearsheimer, 1985-08-21 *Conventional Deterrence* is a book about the origins of war Why do nations faced with the prospect of large scale conventional war opt for or against an offensive strategy John J Mearsheimer examines a number of crises that led to major conventional wars to explain why deterrence failed He focuses first on Allied and German decision making in the years 1939 1940 analyzing why the Allies did not strike first against Germany after declaring war and conversely why the Germans did attack the West Turning to the Middle East he examines the differences in Israeli and Egyptian strategic doctrines prior to the start of the major conventional conflicts in that region Mearsheimer then critically assays the relative strengths and weaknesses of NATO and the Warsaw Pact to determine the prospects for conventional deterrence in any future crisis He is also concerned with examining such relatively technical issues as the impact of precision guided munitions PGM on conventional deterrence and the debate over maneuver versus attrition warfare Mearsheimer pays considerable attention to questions of military strategy and tactics Challenging the claim that conventional detrence is largely a function of the numerical balance of forces he also takes issue with the school of thought that ascribes deterrence failures to the dominance of offensive weaponry In addition to examining the military consideration

underlying deterrence he also analyzes the interaction between those military factors and the broader political considerations that move a nation to war

Frustrated Ambition Richard Bruce Meixsel, 2018-02-15 Vicente Podico Lim 1888 1944 was once his country's best known soldier The first Filipino to graduate from West Point and a graduate of the U S Army War College Lim figured in every significant military development in the Philippines during his thirty years in uniform Frustrated Ambition is the first in depth biography of this forgotten figure whose career paralleled the early twentieth century history of the Philippine military As independence seemed increasingly likely for the Philippines in the 1930s Lim positioned himself to take a leading role in developing armed forces for a sovereign nation But as Lim maneuvered behind the scenes Manuel L Quezon soon to be the commonwealth president revealed that he had invited General Douglas MacArthur to serve as military adviser to the Philippines Frustrated Ambition corrects the conventional historical narrative of events thereafter one that emphasizes the failure of the nascent Philippine military under MacArthur and inflates the general's heroic role in the defense of Bataan and Corregidor Richard Bruce Meixsel restores Lim as the then recognized leader of the opposition to MacArthur's mission and shows how Lim took the Philippine Army in a more tenable direction as MacArthur's military system foundered World War II brought Lim to the fore While MacArthur directed his troops from Corregidor Lim commanded a division on Bataan that may have suffered more combat losses at the battle of Abucay than did all American units on Bataan during the entire campaign When the U S high command turned its efforts to evacuating the Philippine Islands Lim began to prepare for the ensuing underground struggle against the Japanese a fight that cost him his life By recounting Vicente Lim's career Frustrated Ambition illuminates forgotten episodes in Philippine history offers new perspectives on military affairs during the American occupation and recovers the story of Filipino soldiers whose service changed the course of their country's military history
