biogeography John A, Gilbert Klapper, Michael A, 1997-01-01 **The Great Fossil Enigma** Simon J. Knell, 2012-11-06 A fascinating comprehensive accessible account of conodont fossils one of paleontology's greatest mysteries Deserves to be widely read and enjoyed Priscum Stephen Jay Gould borrowed from Winston Churchill when he described the eel like conodont animal as a riddle wrapped in a mystery inside an enigma The search for its identity confounded scientists for more than a century Some thought it a slug others a fish a worm a plant even a primitive ancestor of ourselves As the list of possibilities grew an answer to the riddle never seemed any nearer Would the animal that left behind the miniscule fossils known as conodonts ever be identified Three times the creature was found but each was quite different from the others Were any of them really the one Simon J Knell takes the reader on a journey through 150 years of scientific thinking imagining and arguing Slowly the animal begins to reveal traces of itself its lifestyle its remarkable evolution its witnessing of great catastrophes its movements over the surface of the planet and finally its anatomy Today the conodont animal remains perhaps the most disputed creature in the zoological world *Vital and Health Statistics*, 1989 **Advance Data from**

Vital and Health Statistics, 1991 Origins of the Higher Groups of Tetrapods Hans-Peter Schultze, Linda Trueb, 2018-10-18 This edited volume explores the various views on the origins of tetrapods amphibians reptiles birds and mammals views that agree or differ depending in part on how certain fossil animals are classified and which methodology is used for classification Eighteen chapters by an international group of paleontologists and neontologists here present current

hypotheses emphasizing the kinds of data needed to answer controversial questions as well as the variety of solutions that emerge from different analyses of the same data set The book is arranged in five sections each of which contains an overview essay that either describes the development of various schools of thought regarding the origin of the tetrapod group in question or critically summarizes the arguments presented in the section The first section addresses the origins of tetrapods as a group focusing on lobe finned fishes and early tetrapods Next is a section dealing with amphibians followed by one on reptiles The fourth section concerns avian origins and the final section treats the origins and early diversification of mammals With an overall goal of stimulating critical evaluation by the reader rather than providing unequivocal answers this volume will be of particular interest to vertebrate paleontologists evolutionary morphologists and ichthyological herpetological avian and mammalian systematists

With Stars in Their Eyes James B. Breckinridge, Alec M. Pridgeon, 2022-04-29 The incredible story of the Meinels has never been told nor have their accomplishments and contributions ever been adequately recounted in one publication This book is an effort to redress that oversight using interviews from those who knew them best their own prodigious body of work including an unpublished autobiography and documentation in Presidential libraries as well as universities and the National Archives
