Mexican Architecture The Work Of Abraham Zabludovsky And Teodoro Gonzalez De Leon:

Mexican Architecture Paul Heyer, Abraham Zabludovsky, Teodoro González de León, 1978 **Teodoro González de León : complete work** Miquel Adrià, Teodoro González de León, William J. R. Curtis, 2004 The story of Mexican architecture in the second half of the twentieth century cannot be told without the work of Teodoro Gonzalez de Leon His banks civic buildings museums and office complexes have contributed to defining the urban texture of a large part of Mexico the product of a conception of monumentality in which modernity and timelessness seem to coexist Architect urbanist painter and sculptor Gozalez de Leon is also a tireless promoter of architecture understood as a cultural phenomenon The publication of the complete works of Teodoro Gonzalez de Leon makes it possible to take in a single glance more than fifty years of militant commitment to the discipline Some of the architect s occasional writings have been inserted into the book like his own urban icons throughout the city to illustrate the constant dialectic between work and reflection The conceptual and constructive rigor of Teodoro Gonzalez de Leon has made possible a forceful and original body of work monumental unique at once Mexican and universal His works are conceived as assemblages possessing a singular logic and reality each one is a paragraph a chapter in a story in a method that describes how to make and to understand architecture **Modernity and the Architecture of Mexico** Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obreg n Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus Modernity and the Architecture of Mexico will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect s agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement *The Making of Mexican Modernist Architecture* Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barrag n Jos Villagr n Garc a Juan O Gorman Pedro Ram rez V zquez Agust n Hern ndez Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan Jos D az Infante Enrique Norton Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views

thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture
