Rediscovering China Dynamics And Dilemmas Of Reform:

Rediscovering China Cheng Li, 1997 In an engrossing and evocative account of the profound changes overtaking China Shanghai native Cheng Li shows us from the grassroots a country full of energy irony and paradox Critics praise this work for its wealth of information and stimulating insights 26 photos 6 maps *From Revolution to Reform* He Li, 2004 In *From Revolution to Reform* He Li examines political and economic transformation in China and Mexico from the Mexican and Chinese revolutions at the beginning of the 20th century to economic reforms and political liberalization in recent decades Li also explores lessons that other developing countries could learn from the experiences of China and Mexico *Popular Political Support in Urban China* Jie Chen, 2004 On the basis of three carefully drawn surveys of Beijing residents between 1995 and 1999 the author finds that diffuse support for the current political system based on attitudes toward institutions and values remains strong at least among city dwellers though it is gradually declining *Rural Roots of Reform Before China's Conservative Change* Lynn T. White III, 2018-05-24 China's economic and military rise dominates discussions of the world's most populous country Resilient authoritarian government is credited with great successes but this book expands the discourse to include governance by village heads who often ignored central politicians Chinese reforms for prosperity started circa 1970 under rural and suburban leaders They could act autonomously then because of unexpected political and technological opportunities Their localization of power eroded socialist controls Since 1990 central leaders have tried to reverse reforms made by resilient local bosses New findings especially from the Yangzi delta around Shanghai challenge the top down approach to thinking about governance As Deng Xiaoping admitted the nation's spurt of prosperity began in local communities rather than Beijing Reforms for triple cropping and rural industrialization started long before Mao's death not in 1978 the date most writers cite Country factories competed with state industries for materials and markets Shortages by the 1980s led to inflation government deficits unofficial credit unenforceable planning illegal migrations then international exports and severe political tensions After 1990 Party leaders sought policies to build a Leninist regime that is mostly post socialist These reactionary changes have lasted into the era of Xi Jinping China's reforms and subsequent changes can be understood as results of unintended situations not just ideas and local not just central politics This book will interest students and scholars of Chinese as well as any readers who wonder about comparative development **Why Is The China Model Losing Its Power? - Challenges And Opportunities Of The Second Global Competition** Jinghao Zhou, 2020-07-23 History has proved that communism failed at many levels during the first global competition between the capitalist and socialist camps during the Cold War As a result the socialist camp was dissolved China is one of the few communist countries to survive in the twenty first century The Chinese economy was on the verge of collapse in the 1970s but began to take off in the early 1980s guided by the China model China became the world's second largest economy in 2010 and has quickly expanded its enormous global market and political influence The second global competition between the capitalist countries

and China has started The second global competition is in fact between the China model and the Washington Consensus Will Western hegemonies end as the result of the second global competition Will China be able to rewrite the international rules Will the Chinese communist political system collapse during the competition What should the West do to the China model This book will explore the implications of the China model in the context of the second global competition and argues that the downturn of the China model and China's global expansion are the two sides of the same coin The China model is losing its power but not broken China would be able to become even stronger if it could reshape the philosophical foundation of the China model The future of Western hegemony will depend on how the West understands the China model and deals with it This book addresses these aspects and more

Democratization in China, Korea and Southeast Asia? Kate Xiao Zhou, Shelley Rigger, Lynn T. White III, 2014-01-21 Rapid economic pluralization in East Asia has empowered local and medial groups and with this change comes the need to rethink usual notions regarding ways in which democracies emerge or citizens gain more power Careful examination of current developments in China Korea and Southeast Asia show a need for expansion of our understandings of democracy and democratization This book challenges traditional ways in which political regimes in local as well as national polities are conceived and labeled It shows from Asian experiences that democracy and its precursors come in more forms than most liberals have yet imagined In reviewing recent experiences of countries across East Asia these chapters show that actual democracies and ostensible democratizations there are less like those in the West than the surprisingly consensual and standard political science of democratization suggests This book first examines the extreme variation of democracy's meaning in many Asian states that hold contested elections South Korea Taiwan Indonesia Malaysia the Philippines and Thailand Then it focuses on China It analyzes a range of grassroots forces driving political change in the People's Republic and it finds both accelerators and brakes in China's political reform process The contributors show that models for China's political future exist both within and outside the PRC including in other East Asian states in localities and sectors that already are pushing the limits of the powerful but no longer all powerful Chinese
