Emotions as Original Existences Demian Whiting, 2020-09-25 This book defends the much disputed view that emotions are what Hume referred to as original existences feeling states that have no intentional or representational properties of their own In doing so the book serves as a valuable counterbalance to the now mainstream view that emotions are representational mental states Beginning with a defence of a feeling theory of emotion Whiting opens up a whole new way of thinking about the role and centrality of emotion in our lives showing how emotion is key to a proper understanding of human motivation and the self Whiting establishes that emotions as types of bodily feelings serve as the categorical bases for our behavioural dispositions including those associated with moral thought virtue and vice The book concludes by advancing the idea that emotions make up our intrinsic nature the characterisation of what we are like in and of ourselves when considered apart from how we are disposed to behave The conclusion additionally draws out the implications of the claims made throughout the book in relation to our understanding of mental illness and the treatment of emotional disorders

Knowing Emotions Rick Anthony Furtak, 2018-02-01 How do our emotions enable us to know When Pascal noted that the heart has its own reasons he implied that our rational faculty alone cannot grasp what is revealed in affective experience Knowing Emotions seeks to explain comprehensively why human emotions are more than physiological disturbances but experiences capable of making us aware of significant truths that we could not know by any other means Recent philosophical and interdisciplinary research on the emotions has been dominated by a renewal of the debate over how best to characterize the intentionality of emotions as well as their bodily character Rick Anthony Furtak frames this debate differently however arguing that intentionality and feeling are not two discrete parts of affective experience but conceptually distinguishable aspects of a unified response His account captures how an emotion's phenomenal or felt quality what it is like relates to its intentional content what it is about Knowing Emotions provides a solid introduction to the philosophy of emotion before delving into the debates that surround it Furtak draws from a wide range of analytic and Continental philosophers including Sartre Merleau Ponty Kierkegaard and Nietzsche among others and bolsters his analysis with empirical evidence from social psychology neuroscience and psychiatry Perhaps most importantly Furtak investigates all varieties of affective experience from brief episodes to moods and emotional dispositions loves and other longstanding concerns and overall patterns of temperament and affective outlook Ultimately he argues that we must reject the misguided aspiration to purify ourselves of passion and attain an impersonal standpoint Knowing Emotions attempts to clarify what kind of truth may be revealed through emotion and what can be known not despite but precisely by virtue of each person's idiosyncratic perspective

Thinking about the Emotions Alix Cohen, Robert Stern, 2017-05-26 Philosophical reflection on the emotions has a long history stretching back to classical Greek thought even though at times philosophers have marginalized or denigrated them in favour of reason Fourteen leading

philosophers here offer a broad survey of the development of our understanding of the emotions The thinkers they discuss include Aristotle Aquinas Ockham Descartes Malebranche Spinoza Hobbes Hume Shaftesbury Hutcheson Kant Schiller Schopenhauer Nietzsche James Brentano Stumpf Scheler Heidegger and Sartre Central issues include the taxonomy of the emotions the distinction between emotions passions feelings and moods the relation between the emotions and reason the relationship between the self and the emotions At a metaphilosophical level the collection also raises issues about the value of historical study of the discipline and what light it can shed on contemporary concerns Thinking about the Emotions is a fascinating and illuminating collective study of how philosophers have grappled with this most intriguing part of our nature as beings who feel as well as think and act

Thinking about Feeling Robert C. Solomon, 2004-03-04 Philosophers since Aristotle have explored emotion and the study of emotion has always been essential to the love of wisdom In recent years Anglo American philosophers have rediscovered and placed new emphasis on this very old discipline The view that emotions are ripe for philosophical analysis has been supported by a considerable number of excellent publications In this volume Robert Solomon brings together some of the best Anglo American philosophers now writing on the philosophy of emotion with chapters from philosophers who have distinguished themselves in the field of emotion research and have interdisciplinary interests particularly in the social and biological sciences The reader will find a lively variety of positions on topics such as the nature of emotion the category of emotion the rationality of emotions the relationship between an emotion and its expression the relationship between emotion motivation and action the biological nature versus social construction of emotion the role of the body in emotion the extent of freedom and our control of emotions the relationship between emotion and value and the very nature and warrant of theories of emotion In addition this book acknowledges that it is impossible to study the emotions today without engaging with contemporary psychology and the neurosciences and moreover engages them with zeal Thus the essays included here should appeal to a broad spectrum of emotion researchers in the various theoretical experimental and clinical branches of psychology in addition to theorists in philosophy philosophical psychology moral psychology and cognitive science the social sciences and literary theory

Emotion: The Essence Of Life Kuldip Kumar Dhiman, 2008 [True Emotions](#) Mikko Salmela, 2014-08-15 True Emotions discusses several key problems in emotion research The question about the true nature of

emotions focuses on the role of cognition in human emotions at different levels of analysis functional role types of processes and representations and neural implementation Truth to the self or authenticity has two meanings psychological and normative where the latter is analyzed as coherence between the evaluative content of an emotion and the subject's internally justified beliefs and values Truth to the world is argued to be a matter of correct evaluative representation of the emotional object on the one hand and the existence of the object or the actuality or accurate probability of the represented situation on the other hand Finally authenticity and truth are applied to analyses of the authenticity of occupational emotions and the constitution of sentimental values respectively Recommended reading for philosophers psychologists sociologists and gender researchers

Identity Construction and Science Education Research Maria Varelas, 2012-12-17 In this edited volume science education scholars engage with the constructs of identity and identity construction of learners teachers and practitioners of science Reports on empirical studies and commentaries serve to extend theoretical understandings related to identity and identity development vis vis science education link them to empirical evidence derived from a range of participants educational settings and analytic foci examine methodological issues in identity studies and project fruitful directions for research in this area Using anthropological sociological and socio cultural perspectives chapter authors depict and discuss the complexity messiness but also potential of identity work in science education and show how critical constructs such as power privilege and dominant views access and participation positionality agency structure dialectic and inequities are integrally intertwined with identity construction and trajectories Chapter authors examine issues of identity with participants ranging from first graders to pre service and in service teachers to physics doctoral students to show ways in which identity work is a vital albeit still underemphasized dimension of learning and participating in science in and out of academic institutions Moreover the research presented in this book mostly concerns students or teachers with racial ethno linguistic class academic status and gender affiliations that have been long excluded from or underrepresented in scientific practice science fields and science related professions and linked with science achievement gaps This book contributes to the growing scholarship that seeks to problematize various dominant views regarding for example what counts as science and scientific competence who does science and what resources can be fruitful for doing science

Sound Sentiments David Pugmire, 2005-04-21 Sound Sentiments seeks to open a new path in the philosophy of emotion The focus of most recent work on the philosophy of emotion has been on the nature of emotion with some attention also to the relation of emotion to ethics This book explores the idea that emotions admit of valuation of degrees of adequacy We cannot just decide what to think or to desire or to feel as we can decide to act and these attitudes are integral to emotions Nonetheless emotions can have normative characteristics that resemble virtues Philosophers are familiar with the notion that emotions are valuational But how well they serve that function determines the value they themselves have The book opens with an account of the theory of emotion reflecting recent work on that and considers the way in which emotions are valuational with reference to the

contributions of writers such as de Sousa Gibbard and McDowell The worth of an emotional experience depends on the quality of the valuation it itself achieves Most of the book is then devoted to a set of interconnected themes Some of these concern properties that emotions can have which can variously enhance or detract from them profundity social leverage narcissism and sentimentality Others are attitudes with characteristic emotional loadings and sometimes motivations that raise similar questions cynicism ambivalence and sophistication David Pugmire s general approach is indirect and negative to analyse emotional foibles which tend to elude us as we succumb to them and thereby to point to what soundness in emotion would be He also elicits connections amongst these aspects of the emotional life The most pervasive is the dimension of profundity which opens the discussion each of the subsequent problems amounts to a way in which emotion can be shallow and slight and so amount to less than it seems and accordingly each identifies a form of integrity in the emotions The Logic of Love Andrew J. B. Cameron,2022-12-29 Overviewing what makes the intersection between emotion and ethics so confusing this book surveys an older wisdom in how to manage it using a range of Christian theologians and sources More important even than managing we begin to see a vision for a better set of affections to grow within and among us In this vision emerges a practical and nuanced account of what the Christian tradition sometime summarises as love How may we recover a deep affection for what matters both within ourselves and together in groups This book also dialogues with a new movement in moral psychology social intuitionism Cameron argues that researchers in this discipline have interests and conclusions that sometimes overlap with Christian sources even where their respective lenses differ In this way the book overviews recent trends in moral psychology against a recent historical and contemporary cultural backdrop whilst assaying major sources in Christian theology that offer guidance on moral psychology **Criminology** Eamonn Carrabine,Paul Iganski,Nigel South,Maggy Lee,2004 Covering all the major areas of the subject this introduction to criminology features specific topics such as the history and theory of criminology and categories of crime **The Heart Has Its Reasons** Beata Toth,2016-05-26 The Heart Has Its Reasons explores a hitherto neglected area of theological anthropology the unity of human emotion and reason embodied in the Biblical concept of the heart While the theological contours of human rationality have long been clearly drawn and presented as the exclusive seat of the image of God affectivity has been relegated to a secondary position With the reintegration of the body into recent philosophical and theological discourses a number of questions have arisen if the image also resides in the body how does this change one s view of the theological significance of human affect In what way is our likeness to God realised in the whole of what we are Can one overcome the traditional dissociation between intellect and affect by a renewed theory of love In conversation with patristic and medieval authors like Irenaeus Tertullian Gregory of Nyssa Maximus and Thomas Aquinas and in dialogue with more recent interlocutors such as Blaise Pascal Ricoeur Marion Milbank and John Paul II Beata Toth pursues a novel theological vision of the essential unity of our humanity **Emotions, Ethics, and Authenticity** Mikko Salmela,Verena Mayer,2009-11-30 The relationship of

emotions ethics and authenticity constitutes a nexus of philosophical and psychological problems with wide interdisciplinary relevance What is the proper role of emotions in moral behavior and theory are emotions reliable guides to our authentic personal values and finally what does it mean to be authentic in one s emotions assuming that there is such thing as emotional authenticity in the first place The various contributions of this book seek to answer these vexing but rarely discussed questions offering a broad intellectual tour that ranges from philosophy to psychology sociology and gender studies

Philosophy and the Emotions Anthony Hatzimoysis, 2003-07-21 This major volume of original essays maps the place of emotion in human nature through a discussion of the relation between consciousness and body by analysing the importance of emotion for human agency by pointing to the ways in which practical rationality may be enhanced as well as hindered by emotions and by exploring questions of value in making sense of emotions at a political ethical and personal level Leading researchers in the field reflect on the nature of human feelings how and why we understand what other people feel and the way in which our values become involved in specific emotional phenomena such as guilt fear shame amusement or love This collection addresses important questions in the philosophy of mind and comments on the implications of research in biology cognitive psychology psychoanalysis and narrative theory for the philosophical understanding of emotions
