Moore,1966      **The Earth We Live on** Ruth E. Moore,1971      **The Man who Found Time** Jack Repcheck,2003 There are three men whose contributions helped free science from the straitjacket of theology Two of them Nicolaus Copernicus and Charles Darwin are widely known and justly heralded for their breakthroughs The third James Hutton never achieved the same recognition yet he profoundly changed our understanding of the Earth and the dynamic forces that have shaped it It was Hutton who proved that our planet was millions of years old rather than the biblically determined 6 000 and he who showed that it was continuously being shaped and re shaped by myriad everyday forces rather than one cataclysmic event In this expertly crafted narrative Jack Repcheck tells the remarkable story of this Scottish gentleman farmer and explores how Hutton s simple observations on his small tract of land led him to a theory that flew in the face of the Bible s teaching and also provided the scientific proof that would spark Darwin s theory of evolution It is also a story of the Scottish Enlightenment which brought together some of the greatest thinkers of the age from David Hume and Adam Smith to James Watt and Erasmus Darwin And running through the narrative is a theme about the power of the written word Repcheck argues that Hutton s work was lost to history because he could not describe his findings in graceful and readable prose unlike Darwin s ORIGIN OF THE SPECIES for example Hutton s one and only book was impenetrable and consequently its message was never embraced by a general audience A gripping and enlightening exploration of a little known man and the science he founded THE MAN WHO FOUND TIME is also a parable about the power of books to shape the history of ideas      *The Hollow Earth* Raymond Bernard,2003-01-01      *The Hollow Earth* Dr. R. W. Bernard,1964      **A Voyage of Discovery** Lance Aubrey Endersbee,2006-06-01 This book throws new light

on many popular and scientific beliefs about the origins and extent of the world's water, natural gas and petroleum deposits, the mechanics of deep earthquakes, the continuing but still not understood expansion of the earth and the causes of climate change. Author is a former Dean at Monash University.      **Journey to the Centre of the Earth** David

Whitehouse, 2016-02-11 The journey to the centre of the earth is a voyage like no other we can imagine. Over 3000 km below the earth's surface, an extraordinary inner world the size of Mars awaits us. Dive through the molten iron of the outer core and eventually you will reach a solid sphere, an iron-clad world held within a metal sea and unattached to anything above. At the earth's core is the history of our planet written in temperature and pressure, crystals and minerals. Our planet appears tranquil from outer space. And yet the arcs of volcanoes, the earthquake zones and the auroral glow rippling above our heads are testimony to something remarkable happening inside. For thousands of years, these phenomena were explained in legend and myth. Only in recent times has the brave new science of seismology emerged. One hundred and fifty years after the extraordinary imaginative feat of Jules Verne's JOURNEY TO THE CENTRE OF THE EARTH, David Whitehouse embarks on a voyage of scientific discovery into the heart of our world. Seismologists today reveal a planet astonishingly buried within a planet. We watch as supercomputers convert signals from the ground into three-dimensional scans of subterranean continents, visit laboratories where scientists attempt to reproduce the intense conditions at the centre of the Earth, travel down the throat of a volcano, look into the deepest hole ever drilled and imagine a voyage through enormous crystals of iron. Whitehouse's enthralling journey vividly charts all we are able to understand about the mysteries of the deep Earth. His book encompasses the history of our planet and the latest findings about its inner core, allowing us to embark on an adventure that brings us closer to the enigma of our existence.
