Research Methods for Massage and Holistic Therapies Glenn Hymel, 2005-09-23. This comprehensive resource covers a broad array of research strategies available to massage therapists to give them the tools they need to be knowledgeable readers of research literature as well as active researchers. The primary focus of the book is on the quantitative aspect of research that encompasses the principal types of studies most extensively used in the various health care professions, specifically massage therapy. Extensive coverage is also given to the qualitative and integrative research categories that are progressively gaining recognition among researchers in various health science disciplines and professions. Accommodates the March 2003 mandate from the Commission on Massage Therapy Accreditation (COMTA) that massage therapy schools incorporate into their curricula provisions to ensure a research-literate profession. Examples and techniques for interpreting research guide practitioners and students to be knowledgeable readers of massage therapy research, allowing application to practice. Relies heavily on concept maps, flowcharts, tables, and illustrations and excerpts of published studies to augment the book's narrative development of topics by providing pictorial displays and summaries of the material. Literature-based and hypothetical research examples, illustrations from several manual therapy professions employing therapeutic massage, make the material pertinent to real-life settings. An introductory section at the beginning of each chapter reviews the material covered in the previous chapter and how it relates to the new material. Chapter coverage spans the quantitative, qualitative, and integrative research categories and affiliated research strategies and methods are considered in detail. Review summary tables give an overview of the narrative development of topics. Boxes provide the essential features of a given topic. Relies on multiple examples of possible research scenarios and illustrative excerpts from the published research literature. Content is cross-referenced for use with the Massage Therapy Foundation's Massage Therapy Research Curriculum Kit to provide both instructors and students in the 6, 15, and 24-hour options levels an extensively developed resource in one place. Each chapter includes recommended web sites and software application packages for further information.

Reflexology INGE DOUGANS, 2016-01-28. Reflexology is a form of therapeutic foot massage based on the tried and tested theory that the human body has its own internal energy lines or acupuncture meridians. In this clearly written introduction to the subject, Inge Dougans shows how to find and use the reflexology points and the associated meridians on the foot in order to restore the body to its state of natural balance, prevent ill health, and assist relaxation. Learn how reflexology and the meridian theory work. Follow the illustrated step-by-step reflexology techniques. Use reflexology to balance the body's functions, improve the body's circulation, and general health.

Gemstone Reflexology Nora Kircher,2006-07-23 An innovative and holistic approach that combines the healing powers of gemstones with reflexology therapy Presents a synergistic therapy that can help numerous mental and physical disorders Includes illustrated instructions for determining the specific needs of a disorder and how to apply the therapy Combining the

healing energy of crystals and reflexology therapy Gemstone Reflexology offers a holistic approach to triggering the body's self-healing energies to deal with a large number of mental and physical disorders ranging from heartache to heart disease. The treatment is based on using eight gemstone wands: agate, amethyst, fluorite, heliotrope, rock crystal, rose quartz, rutiled quartz, and sodalite that allow users to direct the healing power of the crystals to activate designated pressure points. Every gemstone has specific healing properties. When crafted into wands, these gems enable the patient to apply the perfect amount of pressure on the appropriate acupressure point. The energies of the crystal combine with the energies released by the pressure on the reflexology point to produce a powerful force for healing. Readers are provided a system of kinetic analysis to determine the appropriate stone and pressure point for their specific condition. Sodalite, for example, has a beneficial effect on mental health which is increased when applied to the pressure points corresponding to the head; agate helps in the treatment of skin disorders and amethyst restores vigor. The book contains illustrated instructions that show the treatment areas for a wide range of conditions including earaches, headaches, and migraines, back and joint pain, colds and flu, low blood pressure, intestinal cramps, cardiovascular disease, and depression.
