Competition over Content Hilde De Weerd, 2020-03-23 Between the sixth and twentieth centuries the civil service examinations created and maintained political coherence across the Chinese polity Preparation for the examinations transformed the lives of literate elites by defining educational standards and disseminating a language that determined elite status However as participation in the examinations became central to that status an intense competition to determine the educational curriculum and the subject matter of the examinations erupted between intellectual and political rivals The principal goal of this book is to explain the restructuring of the examination field during a critical point in its history the Southern Song dynasty 1127-1279 which witnessed the increasing domination of the examinations by the Neo Confucian Learning of the Way movement By analyzing textbooks examination questions and essays and official and private commentary Hilde De Weerd examines how occupational political and intellectual groups shaped curricular standards and examination criteria and how examination standards in turn shaped political and intellectual agendas These questions reframe the debate about the civil service examinations and their place in the imperial order **The Decline of the**

Western-Centric World and the Emerging New Global Order Yun-han Chu, Yongnian Zheng, 2020-11-24 The Western liberal democratic world order which seemingly triumphed following the collapse of communism is looking increasingly fragile as populists and nationalists take power in the United States Europe and elsewhere as the momentum of

democratization in developing countries stalls and as Western liberal establishments fail to deal with economic stagnation worsening political polarization social inequality and migrant crises At the same time there is a shift of economic power from the West towards Asia This book explores these critical developments and their consequences for the world order It considers how far the loss of the West's power to dominate the world order together with the relative decline of US power and its abdication of its global leadership role will lead to more conflict disorder and chaos and how far non Western actors including China India and the Muslim world are capable of establishing visionary policy initiatives which reconfigure the paths and rules of economic integration and globalization and the mechanisms of global governance The book also assesses the sustainability of the economic rise of China and other non Western actors explores the Western liberal democratic order's capacity for resilience and discusses how far the outlook is pessimistic or optimistic The East Asian Challenge for Democracy Daniel A. Bell,Chenyang Li,2013-08-12

The rise of China along with problems of governance in democratic countries has reinvigorated the theory of political meritocracy But what is the theory of political meritocracy and how can it set standards for evaluating political progress and regress To help answer these questions this volume gathers a series of commissioned research papers from an interdisciplinary group of leading philosophers historians and social scientists The result is the first book in decades to examine the rise or revival of political meritocracy and what it will mean for political developments in China and the rest of the world Despite its limitations meritocracy has contributed much to human flourishing in East Asia and beyond and will continue to do so in the future This book is essential reading for those who wish to further the debate and perhaps even help to implement desirable forms of political change **Rural Society and Modern Revolution** Edward Walter Laves,1986

The Politics of Historical Production in Late Qing and Republican China Tze-ki Hon, Robert Culp, 2007-08-13 By examining various forms of historical production happening outside the mainstream of academic history in early 20th century China this book shows how historical writings were central to the Chinese debate on the nation elite authority and active citizenry *Books in Series* ,1979 *The Great Difference* James Hayes, 2012-07-01 James Stewart Lockhart called it the great difference Returned from an inspection tour of the newly leased extension to Hong Kong territory in August 1898 Lockhart a senior Hong Kong colonial official had used this phrase to describe the gulf between the New Territories and its people and the existing British colony of Hong Kong and its inhabitants In this volume James Hayes argues that this the great difference led the colonial government to administer the New Territories and its people differently from the old urban area from the outset resulting in repercussions that affect present day Hong Kong The study covers the whole period of the Lease with all its crowded events and dramatic changes as they affected the native inhabitants and their relationship with the government and over time the many times larger new urban population James Hayes PhD Lond HonDLitt HK is a scholar of the Hong Kong region and its people He worked in the New Territories for almost half his thirty two years of government service and was Regional Secretary in charge of district administration there in 1985 87 His publications include *Friends and Teachers Hong Kong and Its People* 1953 87 Hong Kong University Press 1996 and *South China Village Culture* 2001

material universe For these artists literary modernism was a crisis of perception before it was a crisis of representation When Our Eyes No Longer See portrays an extraordinary moment in the history of this perceptual crisis and in Japanese literature during the 1920s and 1930s The displacement in science of positivist notions of observation by a realist model of knowledge provided endless inspiration for Japanese writers Gregory Golley turns a critical eye to the ideological and ecological incarnations of scientific realism in several modernist works the photographic obsessions of Tanizaki Jun ichiro s Naomi the disjunctive portraits of the imperial economy in Yokomitsu Riichi s Shanghai the tender depictions of astrophysical phenomena and human wildlife relations in the children s stories of Miyazawa Kenji Attending closely to the political and ethical consequences of this realist turn this study focuses on the common struggle of science and art to reclaim the invisible as an object of representation and belief *East Asia: a Bibliography for Undergraduate Libraries* Donald G.
