Criminal Defense in China Sida Liu, Terence C. Halliday, 2016-11-14

This book studies the struggles for basic legal freedoms in the work and political mobilization of defense lawyers in China's criminal justice system **Chinese Politics as Fragmented Authoritarianism** Kjeld Erik Brødsgaard, 2016-10-04 This book explores how far the concept of fragmented authoritarianism remains valid as the key concept for understanding how the Chinese political process works It contrasts fragmented authoritarianism which places bureaucratic bargaining at the centre of policy making arguing that the goals and interests of the implementing agencies have to be incorporated into a policy if implementation is to be secured with other characterisations of China's political process Individual chapters consider fragmented authoritarianism at work in a range of key policy areas including energy issues climate change and environmental management financial reform and civil military relations The book also explores policy making at the national provincial city and local levels debates how far the model of fragmented authoritarianism is valid in its current form or whether modifications are needed and discusses whether the system of policy making and implementation is overcomplicated unwieldy and ineffective or whether it is constructive in enabling widespread consultation and scope for imagination flexibility and variation Collective Democracy Zhiyu Shi, 1999 Chinese democracy is collective democracy argues Chi yu Shih in *Collective Democracy* Democratization in China does not purport to enhance individual human rights rather it aims to preserve and promote a sense of community Democratization is both an assurance that no one will be left alone in the process of development and reform and an attempt to avoid the building of self centered boundaries by social members Consequently elections for people's deputies officials and village directors serve to consolidate the appearance of social consensus In the nascent Chinese democracy contends the author the stress on human relations and the institutionalization of collective interests provide a potentially effective check on the historically familiar abuse of power *China's Deep Reform* Lowell Dittmer, Guoli Liu, 2006-04-07 China's rapid and complex political and socioeconomic changes provide fertile ground for pioneering analysis but they also present daunting theoretical and practical challenges This reader takes up the challenge offering the most comprehensive assessment of Chinese domestic politics available by bringing together the best recent scholarship in the field The anthology focuses on the origin content and significance of the post 1989 phase of China's reform and opening to the world commonly known in the PRC as deep reform This period has been unfolding in interaction with globalization marketization privatization political institutionalization as well as with financial and legal changes Deep reform includes new policy initiatives that have penetrated political legal economic and social sectors untouched by previous initiatives as reformers have been forced to deal with the consequences intended and unintended of earlier reforms These carefully selected essays by leading scholars have been revised and updated for this text In addition a substantive introduction and conclusion place the articles in their broader context for readers new to the subject With the successful transition of the leadership of the party state and military since 2002 the time is ripe for a comprehensive evaluation of China's deep reform as it enters a new stage This timely reader will offer students scholars and policymakers invaluable insights

This book addresses the long standing puzzle of how China's private sector manages to grow without secure property rights and proposes a new theory of selective property rights to explain this phenomenon. Drawing on rich empirical evidence including in depth interviews, a unique national survey of private entrepreneurs, two original national audit experiments and secondary sources, Professor Yue Hou shows that private entrepreneurs in China actively seek opportunities within formal institutions to advance their business interests. By securing seats in the local legislatures, entrepreneurs use their political capital to deter local officials from demanding bribes, ad hoc taxes and other types of informal payments. In doing so they create a system of selective individualized and predictable property rights. This system of selective property rights is key to understanding the private sector growth in the absence of the rule of law. Implementation of Law in the

People's Republic of China Jianfu Chen, Yuwen Li, Jan Michiel Otto, 2021-08-04. China after some twenty years of reform is no longer a country without law. Indeed, one may legitimately complain that there are too many laws that are changing too rapidly. However, law acquires no life nor performs its intended social functions without proper implementation and enforcement. Here, few people, Chinese or foreign, are content with the general situation of implementation of law in China. The problems and difficulties in implementing and enforcing laws and regulations are reported and discussed in the various forums of the Chinese media almost on a daily basis and often reported in Western media also. Academics in China are filling the pages of various legal journals with their diagnoses and analyses of the causes of and solutions to the lack of proper implementation of law and legal regulations and policy measures are being issued to deal with these problems and to overcome the difficulties. The future of the rule of law in China, as we are so often reminded by scholars of Chinese politics and law, largely depends on the proper implementation and enforcement of law. This is a book about law in action in China that focuses on the administration of the law as a process through which law in the books is put into action and hence is made to perform its intended social functions. It deals with the process, the institutional settings, the players and the political, economic, social and cultural settings, the factors involved in the administration of law in China. Throughout the book, we will see a variety of problems and difficulties involved in implementing and enforcing laws and regulations that are identified and analyzed by the contributors. We will also see analyses on legal regulations and policy measures that have been issued to rectify the many identified problems, to raise the standard of actual implementation of law and to improve the functioning of the various law implementing/enforcing authorities. Additionally, the book provides various case studies on implementation of law in China. The present book, we believe, is among the first collective efforts at a systematic and comprehensive study of the

implementation of law in China and we hope that it will stimulate many more such studies on the actual operation and impact of law on society and on individuals *The Nature of Chinese Politics: From Mao to Jiang* Jonathan
