Refractive Surgery Principles And Practice:

Refractive Surgery Howard V. Gimbel, Ellen E. Anderson Penno, 2000 Drs Gimbel and Penno provide a comprehensive look at a wide variety of refractive surgery techniques in their new book. Specific techniques are discussed along with preoperative assessments, counseling and informed consent. In addition to chapters on the commonly performed techniques of LASIK and PRK, there are chapters on intracorneal ring segments, phakic IOL implants, refractive lensectomy and retreatments. The authors take a practical and concise approach to a wide scope of modern refractive surgery techniques which makes this reference valuable for both the experienced and beginning surgeon. Patient examples are featured illustrating the fundamental principles of assessment and choosing the appropriate refractive surgery technique for an individual patient. The inclusion of co-management principles emphasizes integrated care during the assessment and preoperative work up as well as during the postoperative period. This book is an important source that covers many refractive surgery approaches to help you choose the best procedure for your patients and achieve the best results possible.

Principles and Practice of Refractive Surgery Richard Elander, Larry F. Rich, Jeffrey B. Robin, 1997. Introducing the first comprehensive textbook covering all aspects of refractive surgery. Provides the reader with a broad in-depth description of the principles, theories, methods, instrumentation and economics involved with incisional, lamellar and laser surgery correction of refractive errors. Includes contributions from international authorities and provides comprehensive coverage of currently available instrumentations.

Excimer Laser Refractive Surgery Jeffery J. Machat, 1996. This text provides comprehensive information on the approved excimer laser. Aimed at ophthalmologists who want to completely understand the fundamentals of PRK and LASIK, the two procedures are fully defined along with the background of the laser and the development of current technology.
