Genesis and the Big Bang Theory Gerald Schroeder, 2011-09-21 A ground breaking book that takes on skeptics from both sides of the cosmological debate arguing that science and the Bible are not at odds concerning the origin of the universe. The culmination of a physicist's thirty five year journey from MIT to Jerusalem Genesis and the Big Bang presents a compelling argument that the events of the billions of years that cosmologists say followed the Big Bang and those of the first six days described in Genesis are in fact one and the same identical realities described in vastly different terms. In engaging accessible language Dr Schroeder reconciles the observable facts of science with the very essence of Western religion the biblical account of Creation. Carefully reviewing and interpreting accepted scientific principles analogous passages of Scripture and biblical scholarship Dr Schroeder arrives at a conclusion so lucid that one wonders why it has taken this long in coming. The result for the reader whether believer or skeptic Jewish or Christian is a totally fresh understanding of the key events in the life of the universe.

Purpose in the Universe Tim Mulgan, 2015 Two familiar worldviews dominate Western philosophy materialist atheism and the benevolent God of the Abrahamic faiths. Tim Mulgan defends a third way Ananthropocentric Purposivism claims that there is a cosmic purpose but human beings are irrelevant to it. He argues that non human centred cosmic purpose can ground a distinctive human morality.
