A Story of Six Rivers Peter Coates, 2013-06-01 Many of the world's major cities sprang up on the banks of rivers Used for water food irrigation transportation and power rivers sustain life and connect the world together but most of us think of them simply as waterways that must be crossed on the way to another place Using four European and two North American rivers as examples *A Story of Six Rivers* considers the place of rivers in our world and emphasizes the inextricable links between history culture and ecology Peter Coates explores six rivers chosen as examples of the types of rivers found on the planet the Danube the second longest river in Europe the Spree which flows through Berlin the Po which cuts eastward across northern Italy the Mersey in northwest England the Yukon which runs through Canada and Alaska and the Los Angeles in California Creating a series of river biographies Coates gives voice to each of these bodies of water exploring how rivers nurture us provide cultural and economic opportunities and pose threats to our everyday lives He challenges recent narratives that paint rivers as the victims of abuse pollution and damage at the hands of humans focusing on change rather than devastation Describing how humans and rivers form a symbiotic and sometimes mutually destructive relationship Coates argues that rivers illustrate the limits of human authority and that their capacity to inspire us is as strong as our ability to pollute them An intimate portrait of the way these bodies of water inform our lives *A Story of Six Rivers* will make us reconsider the streams and tributaries we traverse each day

and Mapping Eastern Europe Katarzyna Murawska-Muthesius, 2021-05-10 Imaging and Mapping Eastern Europe puts images centre stage and argues for the agency of the visual in the construction of Europe's east as a socio-political and cultural entity. This book probes into the discontinuous processes of mapping the eastern European space and imaging the eastern European body. Beginning from the Renaissance maps of Sarmatia Europea it moves onto the images of women in ethnic dress on the pages of travellers' reports from the Balkans to cartoons of children bullied by dictators in the satirical press to Cold War cartography and it ends with photos of protesting crowds on contemporary dust jackets. Studying the eastern European iconosphere leads to the engagement with issues central for image studies and visual culture: word and image relationship overlaps between the codes of othering and self-fashioning as well as interaction between the diverse modes of production specific to cartography, travel illustrations, caricature and book cover design. This book will be of interest to scholars in art history, visual culture and central Asian, Russian and Eastern European studies. **Riding for Caesar** Micheal P.
