Army. Corps of Engineers,1975 *The Earth Girdled* Thomas De Witt Talmage,1896 Climate and Anthropogenic Impacts on Earth Surface Processes in the Anthropocene Achim Beylich,Daniel Vázquez Tarrío,Dongfeng Li,Marc Oliva,Mario Morellón Marteles,2024-10-03 Climate and Anthropogenic Impacts on Earth Surface Processes in the Anthropocene outlines our current understanding of the effects of ongoing and accelerated environmental changes on Earth surface processes and details the systematic and quantitative methodology on the actual drivers of these processes This book covers various geomorphological process domains and a wide range of terrestrial surface environments on Earth It provides a broad spectrum of advanced techniques and methods of data collection and generation together with various approaches and methods of data analysis and geomorphologic modelling This book is a valuable resource for upper level undergraduates graduates and academics studying Earth surface processes as well as researchers and professionals in needing a comprehensive overview of Earth surface process change and influence during the Anthropocene Comprehensively covers climatic and anthropogenic drivers of earth surface processes including detection and quantification techniques Includes the latest research and suggestions for adapted and sustainable mitigation and management strategies Includes worked examples and case studies of anthropogenic and climate influences on Earth surface processes *River Dynamics* Bruce L. Rhoads,2020-05-07 Rivers are important agents of change that shape the Earth s surface and evolve through time in response to fluctuations in climate and other environmental conditions They are fundamental in landscape development and essential for water supply irrigation and transportation This book provides a comprehensive overview of the geomorphological processes that shape rivers and that produce change in the form of rivers It explores how the dynamics of rivers are being affected by anthropogenic change including climate change dam construction and modification of rivers for flood control and land drainage It discusses how concern about environmental degradation of rivers has led to the emergence of management strategies to restore and naturalize these systems and how river management techniques work best when coordinated with the natural dynamics of rivers This textbook provides an excellent resource for students researchers and professionals in fluvial geomorphology hydrology river science and environmental policy *Earth Mover and Road Builder ...* ,1922 The Earth and Its Inhabitants ...: Oceanica Elisée Reclus,1890 Handbook of Rare Earth Elements Alfred Golloch,2022-07-05 The reference work describes in its new edition still more up to date methods for the recycling and purification processes of rare earth element analysis for industrial and scientific purposes alike Due to their vast applications from computer hardware to mobile phones and electric cars REEs have become a valuable resource for our modern life New topics emission spectroscopy analysis of environmental samples and pharmaceutical applications **Annual Report** United States.

Bureau of Reclamation,1948 **Earth Observation for Flood Applications** Guy J-P. Schumann,2021-05-21 Earth Observation for Flood Applications Progress and Perspectives describes the latest scientific advances in Earth Observation With recent floods around the world becoming ever more devastating there is a need for better science enabling more effective solutions at a fast pace This book aims at stretching from the current flood mapping to diverse real data so as to estimate the flood risk and damage Earth Observation for Flood Applications Progress and Perspectives includes three parts containing each a separate but complementary topic area under floods Each chapter unfolds various applications case studies and illustrative graphics In terms of flood mapping and monitoring the usage of multi sensor satellite data web services information microwave remote sensing methods are discussed in depth So this book is a valuable resource for scientists researchers and students in the area of earth observation Focuses in on one specific application field of Earth Observation Brings the latest scientific advances and perspectives from experts around the world Includes extensive figures tables and case studies to illustrate real life applications Annual Report of the Secretary of the Interior for the Fiscal Year United States. Department of the Interior,1951 Material Culture and Sacred Landscape Peter Jordan,2003 This study provides a concrete example of how foraging societies enculturate and transform the natural environment and through the use of material objects create sacred spaces and sites Using ethnographic and ethnohistorical information about the Khanty of Siberia Jordan shows the shortcomings of both interpretive and materialist anthropological theorizing about hunters and gatherers He focuses on the rich and complex relationship between the symbolism of the Khanty their material culture and the bringing of meaning to physical places His examination looks at the topic in both historical and contemporary contexts and in scales from the core periphery model of Russian colonialism to the portrait of a single yurt community Jordan s work will be of importance to those studying cultural anthropology archaeology and comparative religion *Report Pennsylvania.* Department of Health,1920 **Coherent Flow Structures at Earth's Surface** Jeremy G. Venditti,James L. Best,Michael Church,Richard J. Hardy,2013-08-28 An expert review of recent progress in the study of turbulent flows with a focus on recently identified organized structures This book reviews the recent progress in the study of the turbulent flows that sculpt the Earth s surface focusing in particular on the organized structures that have been identified in recent years within turbulent flows These coherent flow structures can include eddies or vortices at the scale of individual grains through structures that scale with the flow depth in rivers or estuaries to the large scale structure of flows at the morphological or landform scale These flow structures are of wide interest to the scientific community because they play an important role in fluid dynamics and influence the transport erosion and deposition of sediment and pollutants in a wide variety of fluid flow environments Scientific knowledge of these structures has improved greatly over the past 20 years as computational fluid dynamics has come to play an increasing important part in building our understanding of coherent flow structures across a broad range of scales Chapters comprise a series of major invited papers and a selection of the most novel innovative papers

presented at the second Coherent Flow Structures Conference held August 3 5 2011 at Simon Fraser University in Burnaby British Columbia Chapters focus on six major themes Dynamics of coherent flow structures CFS in geophysical flows Interaction of turbulent flows vegetation and ecological habitats Coherent structure of atmospheric flows Numerical modeling of coherent flow structures Turbulence in open channel flows Coherent flow structures sediment transport and morphological feedbacks Journal of the Cleveland Engineering Society Cleveland Engineering Society,1909
