River Running West Pt 2 The Life Of John Wesley Powell:

A River Running West Donald Worster, 2002 This text is a magisterial account of John Wesley Powell the great American explorer and environmental pioneer It tells the true story of undaunted courage in the American West **The North American West in the Twenty-First Century** Brenden W. Rensink, 2022-11 In 1893 Frederick Jackson Turner famously argued that the generational process of meeting and conquering the supposedly uncivilized western frontier is what forged American identity In the late twentieth century new western historians dissected the mythologized western histories that Turner and others had long used to embody American triumph and progress While Turner's frontier is no more the West continues to present America with challenging processes to wrestle navigate and overcome **The North American West in the Twenty First Century** edited by Brenden W Rensink takes stories of the late twentieth century modern West and carefully pulls them toward the present explicitly tracing continuity with or unexpected divergence from trajectories established in the 1980s and 1990s Considering a broad range of topics including environment Indigenous peoples geography migration and politics these essays straddle multiple modern frontiers not least of which is the temporal frontier between our unsettled past and uncertain future These forays into the twenty first century West will inspire more scholars to pull histories to the present and by doing so reinsert scholarly findings into contemporary public awareness **The West and the Word** Steffen Wöll, 2020-10-12 Western expansion in North America has mainly been described as either a linear sequence energized by nineteenth century nation building processes at a moving frontier or as the practice of settler colonialism and its exploitation of resources and displacement of nonwhite peoples This book suggests that shifting the focus from this binary pattern towards spatial imaginations and spatialization processes a new theoretical framework developed at SFB 1199 provides novel insights into the placemaking dynamics of the American West It brings to light a discursive diversity that often contradicts unidirectional interpretive patterns It becomes clear that while some discourses solidified into spatial metanarratives like the character shaping clash of civilizations at the frontier or manifest destiny alternative spatial imaginations exist juxtaposed to or obfuscated by canonical interpretations Making use of a variety of sources including works of literature poetry newspapers paintings and speeches to access spatialization processes on several sociocultural scales the book presents a careful exploration of the parameters that informed the creation affirmation and subversion of spatial imagination of the American West throughout the nineteenth century from the perspective of American Studies 108-2 Hearings: Department of The Interior and Related Agencies Appropriations for 2005, Part 2, 2004, *, 2004 Guide to U.S. Environmental Policy Sally K. Hopi Runners Matthew Sakiestewa Gilbert, 2018-10-10 In the summer of 1912 Hopi runner Louis Tewanima won silver in the 10 000 meter race at the Stockholm Olympics In that same year Tewanima and another champion Hopi runner Philip Zeyouma were soundly defeated by two Hopi elders in a race hosted by members of the tribe Long before Hopis won trophy cups or received acclaim in American newspapers Hopi clan runners competed against each other on and below their mesas and when they won footraces they received rain Hopi Runners provides a window into this venerable tradition at a time of great consequence for Hopi culture The book places Hopi long distance runners within the larger context of American sport and identity from the early 1880s to the 1930s a time when Hopis competed simultaneously for their tribal communities Indian schools city athletic clubs the nation and themselves Author Matthew Sakiestewa Gilbert brings a Hopi perspective to this history His book calls attention to Hopi philosophies of running that connected the runners to their villages at the same time it explores the internal and external forces that strengthened and strained these cultural ties when Hopis competed in US marathons Between 1908 and 1936 Hopi marathon runners such as Tewanima Zeyouma Franklin Suhu and Harry Chaca navigated among tribal dynamics school loyalties and a country that closely associated sport with US nationalism The cultural identity of these runners Sakiestewa Gilbert contends challenged white American perceptions of modernity and did so in a way that had national and international dimensions This broad perspective linked Hopi runners to athletes from around the world including runners from Japan Ireland and Mexico and thus Hopi Runners suggests caused non Natives to reevaluate their understandings of sport nationhood and the cultures of American Indian people

Recollections of a Petrologist Joseph Paxson Iddings, 2015 Joseph Paxson Iddings 1857-1920 was a central participant in the rise of theoretical petrology His scientific autobiography *Recollections of a Petrologist* recounts virtually all of his petrological exploits as well as the ideas and contributions of many of his contemporaries **Encyclopedia of the Lewis**

Alter, 2021-06-22 Linguistics or the science of language emerged as an independent field of study in the nineteenth century amid the religious and scientific ferment of the Victorian era William Dwight Whitney one of that period's most eminent language scholars argued that his field should be classed among the social sciences thus laying a theoretical foundation for modern sociolinguistics William Dwight Whitney and the Science of Language offers a full length study of America's pioneer professional linguist the founder and first president of the American Philological Association and a renowned Orientalist In recounting Whitney's remarkable career Stephen G Alter examines the intricate linguistic debates of that period as well as the politics of establishing language study as a full fledged science Whitney's influence Alter argues extended to the German Neogrammarian movement and the semiotic theory of Ferdinand de Saussure This exploration of an early phase of scientific language study provides readers with a unique perspective on Victorian intellectual life as well as on the transatlantic roots of modern linguistic theory **Catholic and French Forever** Joseph F. Byrnes, 2005-11-02 It is often said that there are

two Frances Catholic and secular This notion dates back to the 1790s when the revolutionary government sought to divorce Catholic Christianity from national life While Napoleon formally reconciled his regime to France's millions of Catholics church state relations have remained a source of conflict and debate throughout the nineteenth and twentieth centuries In *Catholic and French Forever* Joseph Byrnes recounts the fights and reconciliations between French citizens who found Catholicism integral to their traditional French identity and those who found the continued presence of Catholicism an obstacle to both happiness and progress He does so through stories of priests legislators intellectuals and pilgrims whose experiences manifest the problem of being both Catholic and French in modern France Byrnes finds that loyalties to the French nation and Catholicism became so incompatible in the revolutionary era that Catholic believers responded defensively across the nineteenth century politicizing both religious pilgrimage and the languages of religious instruction He shows that a *d tente* emerged in the first decades of the twentieth century with the respect given to priests in arms during World War I and to the work of religious art historian mile M le This *d tente* has lasted precariously and with interruption up to the present day *Plato's Dialectic at Play* Kevin Corrigan, Elena Glazov-Corrigan, 2015-10-29 The Symposium is one of Plato's most accessible dialogues an engrossing historical document as well as an entertaining literary masterpiece By uncovering

the structural design of the dialogue Plato's *Dialectic at Play* aims at revealing a Plato for whom the dialogical form was not merely ornamentation or philosophical methodology but the essence of philosophical exploration His dialectic is not only argument it is also play Careful analysis of each layer of the text leads cumulatively to a picture of the dialogue's underlying structure related to both argument and myth and shows that a dynamic link exists between Diotima's higher mysteries and the organization of the dialogue as a whole On this basis the authors argue that the *Symposium* with its positive theory of art contained in the ascent to the Beautiful may be viewed as a companion piece to the *Republic* with its negative critique of the role of art in the context of the Good Following Nietzsche's suggestion and applying criteria developed by Mikhail Bakhtin they further argue for seeing the *Symposium* as the first novel The book concludes with a comprehensive reevaluation of the significance of the *Symposium* and its place in Plato's thought generally touching on major issues in Platonic scholarship the nature of art the body-soul connection the problem of identity the relationship between mythos and logos Platonic love and the question of authorial writing and the vanishing signature of the absent Plato himself *Lost Worlds* Jonathan

Dewald, 2015-09-10 Today's interest in social history and private life is often seen as a twentieth-century innovation Most often Lucien Febvre and the *Annales* school in France are credited with making social history a widely accepted way for historians to approach the past In *Lost Worlds* historian Jonathan Dewald shows that we need to look back further in time into the nineteenth century when numerous French intellectuals developed many of the key concepts that historians employ today According to Dewald we need to view Febvre and other *Annales* historians as participants in an ongoing cultural debate over the shape and meanings of French history rather than as inventors of new topics of study He closely examines the work of Charles Augustin Sainte-Beuve Hippolyte Taine the antiquarian Alfred Franklin Febvre himself the twentieth-century historian Philippe Ariès and several others A final chapter compares specifically French approaches to social history with those of German historians between 1930 and 1970 Through such close readings Dewald looks beyond programmatic statements of historians' intentions to reveal how history was actually practiced during these years A bold work of intellectual history *Lost Worlds* sheds much needed light on how contemporary ideas about the historian's task came into being Understanding this larger context enables us to appreciate the ideological functions performed by historical writing through the twentieth century [Reconsidering American Power](#) John D. Kelly, Kurt Jacobsen, Marston H. Morgan, 2019-12-05

Postcolonial studies postmodern studies even posthuman studies emerge and intellectuals demand that social sciences be remade to address fundamentals of the human condition from human rights to global environmental crises Since these fields owe so much to American state sponsorship is it easier to reimagine the human and the modern than to properly measure the pervasive American influence *Reconsidering American Power* offers trenchant studies by renowned scholars who reassess the role of the social sciences in the construction and upkeep of the Pax Americana and the influence of Pax Americana on the social sciences With the thematic image for this enterprise as the fiery hunt for Ahab's whale the contributors pursue

realities behind the theories and reconsider the real origins and motives of their fields with an eye on what will deter or repurpose the fiery hunts to come by offering a critical insider's view *Vision and Place* Jason Robison, Daniel McCool, Thomas Minckley, 2020-10-27 The Colorado River Basin's importance cannot be overstated Its living river system supplies water to roughly forty million people contains Grand Canyon National Park Bears Ears National Monument and wide swaths of other public lands and encompasses ancestral homelands of twenty nine Native American tribes John Wesley Powell a one armed Civil War veteran explorer scientist and adept federal administrator articulated a vision for Euro American colonization of the Arid Region that has indelibly shaped the basin a pattern that looms large not only in western history but also in contemporary environmental and social policy One hundred and fifty years after Powell's epic 1869 Colorado River Exploring Expedition this volume revisits Powell's vision examining its historical character and its relative influence on the Colorado River Basin's cultural and physical landscape in modern times In three parts the volume unpacks Powell's ideas on water public lands and Native Americans ideas at once innovative complex and contradictory With an eye toward climate change and a host of related challenges facing the basin the volume turns to the future reflecting on how if at all Powell's legacy might inform our collective vision as we navigate a new Great Unknown Library Journal ,2002 **The Great Ocean** David Igler, 2013-03-18 The Pacific of the early eighteenth century was not a single ocean but a vast and varied waterscape a place of baffling complexity with 25 000 islands and seemingly endless continental shorelines But with the voyages of Captain James Cook global attention turned to the Pacific and European and American dreams of scientific exploration trade and empire grew dramatically By the time of the California gold rush the Pacific's many shores were fully integrated into world markets and world consciousness The Great Ocean draws on hundreds of documented voyages some painstakingly recorded by participants some only known by archeological remains or indigenous memory as a window into the commercial cultural and ecological upheavals following Cook's exploits focusing in particular on the eastern Pacific in the decades between the 1770s and the 1840s Beginning with the expansion of trade as seen via the travels of William Shaler captain of the American Brig Lelia Byrd historian David Igler uncovers a world where voyagers traders hunters and native peoples met one another in episodes often marked by violence and tragedy Igler describes how indigenous communities struggled against introduced diseases that cut through the heart of their communities how the ordeal of Russian Timofei Tarakanov typified the common practice of taking hostages and prisoners how Mary Brewster witnessed first hand the bloody great hunt that decimated otters seals and whales how Adelbert von Chamisso scoured the region carefully compiling his notes on natural history and how James Dwight Dana rivaled Charles Darwin in his pursuit of knowledge on a global scale These stories and the historical themes that tie them together offer a fresh perspective on the oceanic worlds of the eastern Pacific Ambitious and broadly conceived The Great Ocean is the first book to weave together American oceanic and world history in a path breaking portrait of the Pacific world A History of America in 100 Maps Susan Schulten, 2018-09-21

Throughout its history America has been defined through maps Whether made for military strategy or urban reform to encourage settlement or to investigate disease maps invest information with meaning by translating it into visual form They capture what people knew what they thought they knew what they hoped for and what they feared As such they offer unrivaled windows onto the past In this book Susan Schulten uses maps to explore five centuries of American history from the voyages of European discovery to the digital age With stunning visual clarity *A History of America in 100 Maps* showcases the power of cartography to illuminate and complicate our understanding of the past Gathered primarily from the British Library's incomparable archives and compiled into nine chronological chapters these one hundred full color maps range from the iconic to the unfamiliar Each is discussed in terms of its specific features as well as its larger historical significance in a way that conveys a fresh perspective on the past Some of these maps were made by established cartographers while others were made by unknown individuals such as Cherokee tribal leaders soldiers on the front and the first generation of girls to be formally educated Some were tools of statecraft and diplomacy and others were instruments of social reform or even advertising and entertainment But when considered together they demonstrate the many ways that maps both reflect and influence historical change Audacious in scope and charming in execution this collection of one hundred full color maps offers an imaginative and visually engaging tour of American history that will show readers a new way of navigating their own worlds
