River Too Far The Past And Future Of The Arid West:

Organisation Institutionnelle de la Gestion de L'eau Aux XIXe Et XXe Siecles J. C. N. Raadschelders, 2005 Water management has become a major issue for public policies at any latitude How and why this happened could not be assessed efficiently without developing a longitudinal and comparative analysis such as the one in this book Institutional arrangements for the provision and the use of water are peculiarly persistent as well as remarkably resilient This makes them an ideal subject of an historical account Not that history is worth writing about only when it treats immutable phenomena On the contrary its main purpose is to record changes and possibly explain them But long lasting continuity urges the scholar to venture into the remote past since only there are to be discovered the initial causes and the deeper meanings of the institutions under scrutiny Also continuity makes the strength of path dependency all the more evident and consequently underlines the weight of history

Stegner Megan Riley McGilchrist, 2012-06-25 The western American landscape has always had great significance in American thinking requiring an unlikely union between frontier mythology and the reality of a fragile western environment

Additionally it has borne the burden of being a gendered space seen by some as the traditional virgin land of the explorers and pioneers subject to masculine desires and by others as a masculine space in which the feminine is neither desired nor appreciated Both Wallace Stegner and Cormac McCarthy focus on this landscape and environment its spiritual narrative symbolic imaginative and ideological force is central to their work In this study McGilchrist shows how their various treatments of these issues relate to the social climates pre and post Vietnam era in which they were written and how despite historical discontinuities both Stegner and McCarthy reveal a similar unease about the effects of the myth of the frontier on American thought and life The gendering of the landscape is revealed as indicative of the attempts to deny the failure of the myth and to force the often numinous western landscape into parameters which will never contain it Stegner s pre Vietnam sensibility allows the natural world to emerge tentatively triumphant from the ruins of frontier mythology whereas McCarthy s conclusions suggest a darker future for the West in particular and America in general However McGilchrist suggests that the conclusion of McCarthy s Border Trilogy upon which her arguments regarding McCarthy are largely based offers a gleam of hope in its final conclusion of acceptance of the feminine

Hoover Dam Barbara Vilander, 2022-02-22 Hoover Dam was constructed during one of the most depressed economic climates in American history in a remote desert canyon where temperatures ranged from single to triple digits In order to visually document the project the Bureau of Reclamation assigned employee Ben Glaha to photograph all aspects of the dam s construction Glaha s photographs were used in press releases periodicals books pamphlets and slide shows to demonstrate that the dam was structurally sound and that government funds were being used wisely Hoover Dam The Photographs of Ben Glaha is the first detailed examination of Glaha s images of the project some of which have never before been published Glaha photographed every aspect of the construction process from details of how the dam was assembled to the overall progress as the dam rose from the bottom of the dry riverbed Glaha not only provided the Bureau with the photographs it required he also employed his own artistic abilities to produce images of the dam that were exhibited in museums and galleries as works of art Because Glaha was able to create a selection of Hoover Dam photographs worthy of exhibition he was unique among government documentary photographers Art historian Barbara Vilander s text places Glaha s efforts within the historical context of western landscape exploration and development and reveals how his particular qualifications led to his selection as the project photographer Vilander then examines the many publications and venues in which the Bureau used Glaha s photographs to create support for the project She also discusses how Glaha was recognized in his own era as an influential artist and teacher and compares his work with that of other contemporary landscape photographers addressing western water management Glaha s Hoover Dam images were widely published although in accordance with Bureau policy he was not usually given personal credit and therefore his name remains largely unknown Vilander s book corrects that oversight by giving Glaha the technical and artistic credit he is due within the context of one of the most ambitious projects in American history

Contested Waters April R. Summitt, 2013-04-15 To fully understand this river and its past one must examine many separate pieces of history scattered throughout two nations seven states within the United States and two within Mexico and sort through a large amount of scientific data One needs to be part hydrologist geologist economist sociologist anthropologist and historian to fully understand the entire story Despite this river's narrow size and meager flow its tale is very large indeed From the conclusion The Colorado River is a vital resource to urban and agricultural communities across the Southwest providing water to 30 million people Contested Waters tells the river's story a story of conquest control division and depletion Beginning in prehistory and continuing into the present day Contested Waters focuses on three important and often overlooked aspects of the river's use the role of western water law in its over allocation the complexity of power relationships surrounding the river and the concept of sustainable use and how it has been either ignored or applied in recent times It is organized in two parts the first addresses the chronological history of the river and long term issues while the second examines in more detail four specific topics metropolitan perceptions American Indian water rights US Mexico relations over the river and water marketing issues Creating a complete picture of the evolution of this crucial yet over utilized resource this comprehensive summary will fascinate anyone interested in the Colorado River or the environmental history of the Southwest

Wild Edges Gregory Conniff, Chazen Museum of Art, 2006 Gregory Conniff's large scale black and white pastoral images evoke the sensuality of nineteenth century photographic materials In his affectionate and intelligent work there is a visible connection to the history of landscape art reaching back as far as Claude Lorrain and

seventeenth century Dutch drawing Conniff is also a leading practitioner of a new pastoralism that is casting a contemporary eye on the current state of America's open land Postmodern in the best sense Conniff's pictures address the timeless human need to see beauty in the world that shapes our lives A resident of Wisconsin for more than thirty years Conniff has focused much of his artistic energy on the rural Midwest exploring the interdependent relationship between land and people For the past fifteen years Conniff has also been making pictures of rural Mississippi again focusing on elements of the landscape that resonate with a universal sense of aesthetic familiarity As he explains I am interested in work that defines and protects the vanishing commonplace beauties that let us know we're home

Decolonizing Nature William Adams, Martin

Mulligan, 2012-04-27 British imperialism was almost unparalleled in its historical and geographical reach leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe Colonial annexation and government were based on an all encompassing system that integrated and controlled political economic social and ethnic relations and required a similar annexation and control of natural resources and nature itself Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation At the start of the 21st century the conservation of nature is of undiminished importance in post colonial societies yet the legacy of colonial thinking endures What should conservation look like today and what indeed whose ideas should it be based upon Decolonizing Nature explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people politics and nature in countries and cultures that were once part of the British Empire It locates the historical development of the theory and practice of conservation at both the periphery and the centre firmly within the context of this legacy and considers its significance today It highlights the present and future challenges to conservationists of contemporary global neo colonialism The contributors to this volume include both academics and conservation practitioners They provide wide ranging and insightful perspectives on the need for and practical ways to achieve new forms of informed ethical engagement between people and nature
