River With No Bridge:

River with No Bridge Sue Sumii, 2011-12-27 The River With No Bridge Hashi no nai kawa explores with outspoken frankness a subject still taboo in Japan the intolerance and bigotry faced daily by Japan's largest minority group the burakumin Racially no different from other Japanese over the centuries burakumin have been cruelly ostracized for their association with occupations considered defiling Spanning the years 1908 to 1924 the original six volumes of this novel trace the developing awareness of burakumin of their rights and dignity as human beings Volume 1 translated into English for the first time in 1990 is a story about childhood in a burakumin village It tells of young Koji Hatana's questioning of the rigid social order and his growing sense of injustice as he meets prejudice from other children at school and from his teachers who try to instill in him their belief that since he was born defiled he should resign himself to his fate Told against the backdrop of Japan's struggle to shed its feudalistic past and enter the modern age the novel is a courageous work and a compelling read

to define EWS identify its components and functions peculiarities and weak points Only at that point a first attempt to evaluate EWS performance was possible Flood Early Warning Systems Performance is organised according to the conceptual steps required by the research In part I the open questions about the definition and the role of EWSs are handled the aim being the identification of how to evaluate their effectiveness performance Part II focuses on the real aim of the research providing concepts and tools to assess EWS performance suggested tools are also implemented in a case study to describe how they can be applied in practice Focusing specifically on the topic of flood risk in mountainous regions the book can be viewed as a sort of manual for EWS designers managers and users It is organised into different independent sections which will appeal both to experts as well as those with an interest in the subject Most of results can also be exported to other hazards
