Urban Water Systems & Floods II S. Hernández, S. Mambretti, D. Proverbs, J. Puertas, 2018-08-21

Developing an improved understanding of emerging flood risk management and urban water management was the goal set for research presented at the 6th International Conference on Flood and Urban Water Management held in A Coruña Spain

The published papers look to solve various challenges in this field by drawing on the expertise of numerous disciplines and considering a range of responses

Flooding is a global phenomenon that claims numerous lives worldwide each year

When flooding occurs in urban areas it can cause substantial damage to property as well as threaten human life

In addition many more people must endure the homelessness upset and disruption that are left in the wake of floods

The increased frequency of flooding in the last few years coupled with climate change predictions and urban development suggest that these impacts are set to worsen in the future

How we respond and importantly adapt to these challenges is key to developing our long term resilience at the property community and city scale

Apart from the physical damage to buildings contents and loss of life which are the most obvious impacts of floods upon households other more indirect losses are often overlooked

These indirect and intangible impacts are generally associated with disruption to normal life as well as long term health issues including community displacements and stress related illnesses

Flooding represents a major barrier to the alleviation of poverty in many parts of the developing world where vulnerable communities are often exposed to sudden and life threatening events

As our cities continue to expand their urban infrastructures need to be re evaluated and adapted to new requirements related to the increase in population and the growing areas under urbanization The papers contained in this book consider these problems and deals with two main urban water topics water supply systems and urban drainage *Federal Energy Regulatory Commission Reports* United States.
