River Dragon:

River Dragon Diane Carr, Kira Earley, 2003 Fantasy based on the dragon statue that used to stand at the southernmost tip of Merritt Island Fla CD contains both the story and a song *Don't Tell the Boss!* Dmitry Chernov, Didier Sornette, Giovanni Sansavini, Ali Ayoub, 2023-01-20 After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level But for a variety of reasons this crucial information did not reach decision makers So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming What is the problem with communication about risk in an organization and why does this problem exist What stops people in organizations or project teams from freely reporting and discussing critical risks This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part These case studies are drawn from around the world and span a range of industries civil nuclear power coal oil and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019 2020 The full picture of the very early stage of the COVID 19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak **Code of Federal Regulations**, 2016 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries **Xtoriez** Grant L. History of Literature in the Yuan Dynasty Li Shi, The book is the volume of History of Literature in the Yuan Dynasty among a series of books of Deep into China Histories The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty c 1600-1046 BC and the Bamboo Annals 296 BC describe a Xia dynasty c 2070-1600 BC before the Shang but no writing is known from the period The Shang ruled in the Yellow River valley which is commonly held to be the cradle of Chinese civilization However Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before the Shang

With thousands of years of continuous history China is one of the world's oldest civilizations and is regarded as one of the cradles of civilization. The Zhou dynasty (1046-256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC-220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644-1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927-1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras, control stretched as far as Xinjiang and Tibet as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

The Age of Ecology Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today. Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories, each with its own dramatic tension between single-issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players. While the history can be traced back several centuries, environmentalism has flourished since the environmental revolution of 1970, spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming. While environmentalists often opposed the scientific mainstream, they were also often led by scientific knowledge. Environmentalism is the true Enlightenment of our time, so much so that we can call our era the age of ecology. This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time.

Echoes from the Poisoned Well Jeffrey Stine,2006-03-07 The emerging environmental justice movement has created greater awareness among scholars that communities from all over the world suffer from similar environmental inequalities This volume takes up the challenge of linking the focussed campaigns and insights from African American campaigns for environmental justice with the perspectives of this global group of environmentally marginalized groups The editorial team has drawn on Washington s work on Paul Rosier s study of Native American environmentalism and on Heather Goodall s work with Indigenous Australians to seek out wider perspectives on the relationships between memories of injustice and demands for environmental justice in the global arena This collection contributes to environmental historiography by providing bottom up environmental histories in a field which so far has mostly emphasized a top down perspective in which the voices of those most heavily burdened by environmental degradation are often ignored The essays here serve as a modest step in filling this lacuna in environmental history by providing the viewpoints of peoples and of indigenous communities which traditionally have been neglected while linking them to a global context of environmental activism and education Scholars of environmental justice as much as the activists in their respective struggle face challenges in working comparatively to locate the differences between local struggles as well as to celebrate their common ground In this sense the chapters in this book represent the opening up of spaces for future conversations rather than any simple ending to the discussion The contributions however reflect growing awareness of that common ground and a rising need to employ linked

experiences and strategies in combating environmental injustice on a global scale in part by mimicking the technology and tools employed by global corporations that endanger the environmental integrity of a diverse set of homelands and ecologies

Belgian Fairy Tales William Elliot Griffis, 1919 **Prince of Dreams** Curt Benjamin, 2003-09-02 When Llesho was seven the Harn invaded his family's mountain kingdom of Thebin. His guards slaughtered him; he was carried off and sold into slavery as far as he knew the sole survivor of his royal family. At fifteen he learned his brothers were still alive and had also been sold into slavery. And so began his quest to earn his freedom and then find and rescue his brothers so that they might win back their kingdom from the cruel barbaric Harn. But each success led to greater peril and even with the aid of two of his brothers, the trickster god, a young witch, and her even more powerful father, several gladiators, and the Emperor Shou, Llesho was not certain he'd be able to reach his goal. Not when both the Harn and the evil Master Markko were set on his death and not when the very gates of heaven seemed to be shut against him. Only if Llesho could learn the truth about his mysterious heritage and the powers locked inside him did he stand a chance of saving his people and reopening the pathway between mortals and gods.

In a Yün-nan Courtyard Louise Jordan Miln, 1927 At the River's Edge Toby Lewis, 2022-03-14

Sometimes magic and spiritism can be one in the same. Luci Lin, an unwanted child discarded at the river's edge by an uncaring father and a mother too filled with fear to object, finds life despite the callous heart that conceived her. The magic is the childless couple out for a morning stroll along the river's edge being led by a butterfly to a newborn baby rolled up in rags laid in a bush near the river's edge as an offering to a voracious reptile. The spiritism is the belief in the one true God and that the butterfly was one of his angels sent to watch over that child. From that day forward the insect would watch over and protect the child it rescued at the river's edge.
