Robert AM Stern Robert A. M. Stern, 1991 Robert Stern's work as an architect is indivisible from his abiding concern with history and historical style and he is seen as one of the originators and key theorists of post modernism The 33 projects featured here reveal the range of influences which have informed Stern's buildings *Bibliographic Guide to Art and Architecture* New York Public Library. Art and Architecture Division, 1975 *Robert AM Stern* Robert A. M. Stern, 1991-01

Stone Built Lee Goff, 1997 This volume presents twenty seven contemporary residences spanning the entire stylistic spectrum and thoroughly documented with color photography The United States has always had a great number of stone houses subject to regional and stylistic variations as author Lee Goff writes in her comprehensive introduction That history and variety are alive today as houses of stone continue to appear in myriad guises classical modern vernacular postmodern throughout the country In fact Goff concludes that a new renaissance of stone houses is at hand The exceptional residences in this book by such renowned architects as Hardy Holzman Pfeiffer Will Bruder 1100 Architect Bohlin Cywinski Jackson Lake Flato and Kohn Pedersen Fox provide ample evidence of this renaissance Goff discusses with each architect the design of each house focusing on the decision to use stone the building process and other related choices while color photographs illustrate both exteriors and interiors *Philip Johnson* Beatriz Colomina, 2009 An illustrated collection of essays analyzing the work and cultural politics of the influential twentieth century American architect Philip Johnson

Building
Greenwich Rachel Carley, 2005 *Wright on Exhibit* Kathryn Smith, 2022-07-12 The first history of Frank Lloyd Wright's exhibitions of his own work a practice central to his career More than one hundred exhibitions of Frank Lloyd Wright's work were mounted between 1894 and his death in 1959 Wright organized the majority of these exhibitions himself and viewed them as crucial to his self presentation as his extensive writings He used them to promote his designs appeal to new viewers and persuade his detractors Wright on Exhibit presents the first history of this neglected aspect of the architect's influential career Drawing extensively from Wright's unpublished correspondence Kathryn Smith challenges the preconceived notion of Wright as a self promoter who displayed his work in search of money clients and fame She shows how he was an artist architect projecting an avant garde program an innovator who expanded the palette of installation design as technology evolved and a social activist driven to revolutionize society through design While Wright's earliest exhibitions were largely for other architects by the 1930s he was creating public installations intended to inspire debate and change public perceptions about architecture The nature of his exhibitions expanded with the times beyond models drawings and photographs to include more immersive tools such as slides film and even a full scale structure built especially for his 1953 retrospective at the Guggenheim Museum Placing Wright's exhibitions side by side with his writings Smith shows how integral these exhibitions were to his vision and sheds light on the broader discourse concerning architecture and modernism during the first half of the twentieth century Wright on Exhibit features color renderings photos and plans as well as a

checklist of exhibitions and an illustrated catalog of extant and lost models made under Wright's supervision *Catalog of the Avery Memorial Architectural Library of Columbia University: A - Architecture* Pg Avery Library, 1968 The Houses of Philip Johnson Stover Jenkins, David Mohny, Philip Johnson, 2001 Until now however that house has not been looked at in the context of Johnson's many other house projects This book the first to comprehensively survey Johnson's residential work not only brings to light a largely neglected side of Johnson's achievement but freshly illuminates his entire career BOOK JACKET

Contemporary Architects Ann Lee Morgan, Colin Naylor, 1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor's note **Subject Guide to Books in Print**, 1997

Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 Paradise Planned is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United States and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape

Venturi, Rauch & Scott Brown Antonio Sanmartin, 1986 Robert Venturi along with his partners John Rauch and Denise Scott Brown have from the beginning been leading exponents of Post Modernism and have pioneered polemic stylistic innovations in architecture and design often combining traditional and modern Venturi's seminal *Complexity and Contradiction in Architecture* and *Learning from Las Vegas* acknowledged as two of the most important writings on architecture this century re-shaped the sensibilities of a whole generation of architects and opened the way to a freer more eclectic architecture But it is in VRSB's built works that this theory is reified into practice and their latest commission to design the extension to the National Gallery in Trafalgar Square places VRSB once more in the forefront of architectural
