The Economics of Attention

Richard A. Lanham,2006-04-21 If economics is about the allocation of resources then what is the most precious resource in our new information economy Certainly not information for we are drowning in it No what we are short of is the attention to make sense of that information With all the verve and erudition that have established his earlier books as classics Richard A Lanham here traces our epochal move from an economy of things and objects to an economy of attention According to Lanham the central commodity in our new age of information is not stuff but style for style is what competes for our attention amidst the din and deluge of new media In such a world intellectual property will become more central to the economy than real property while the arts and letters will grow

to be more crucial than engineering the physical sciences and indeed economics as conventionally practiced For Lanham the arts and letters are the disciplines that study how human attention is allocated and how cultural capital is created and traded In an economy of attention style and substance change places The new attention economy therefore will anoint a new set of moguls in the business world not the CEOs or fund managers of yesteryear but new masters of attention with a grounding in the humanities and liberal arts Lanham's *The Electronic Word* was one of the earliest and most influential books on new electronic culture *The Economics of Attention* builds on the best insights of that seminal book to map the new frontier that information technologies have created

The Many Faces of Weimar Cinema Christian Rogowski, 2010 Traditionally Weimar cinema has been equated with the work of a handful of auteurist filmmakers and a limited number of canonical films Often a single limited phenomenon expressionist film has been taken as synonymous with the cinema of the entire period But in recent decades such reductive assessments have been challenged by developments in film theory and archival research that highlight the tremendous richness and diversity of Weimar cinema This widening of focus has brought attention to issues such as film as commodity questions of technology and genre transnational collaborations and national identity effects of changes in socioeconomics and gender roles on film spectatorship and connections between film and other arts and media Such shifts have been accompanied by archival research that has made a cornucopia of new information available now augmented by the increased availability of films from the period on DVD This wealth of new source material calls for a re-evaluation of Weimar cinema that considers the legacies of lesser known directors and producers popular genres experiments of the artistic avant garde and nonfiction films all of which are aspects attended to by the essays in this volume Contributors Ofer Ashkenazi Jaimey Fisher Veronika Fuechtner Joseph Garncarz Barbara Hales Anjeana Hans Richard W McCormick Nancy P Nenno Elizabeth Otto Mihaela Petrescu Theodore F Rippey Christian Rogowski Jill Smith Philipp Stiasny Chris Wahl Cynthia Walk Valerie Weinstein Joel Westerdale Christian Rogowski is Professor of German at Amherst College
