**George Inness and the Science of Landscape** Rachael Z. DeLue, 2008-09-15 George Inness 1825 94 long considered one of America s greatest landscape painters has yet to receive his full due from scholars and critics A complicated artist and thinker Inness painted stunningly beautiful evocative views of the American countryside Less interested in representing the details of a particular place than in rendering the subjective mystery of nature Inness believed that capturing the spirit or essence of a natural scene could point to a reality beyond the physical or as Inness put it the reality of the unseen Throughout his career Inness struggled to make visible what was invisible to the human eye by combining a deep interest in nineteenth century scientific inquiry including optics psychology physiology and mathematics with an idiosyncratic brand of mysticism Rachael Ziady DeLue s George Inness and the Science of Landscape the first in depth examination of Inness s career to appear in several decades demonstrates how the artistic spiritual and scientific aspects of Inness s art found expression in his masterful landscapes In fact Inness s practice was not merely shaped by his preoccupation with the nature

and limits of human perception he conceived of his labor as a science in its own right This lavishly illustrated work reveals Inness as profoundly invested in the science and philosophy of his time and illuminates the complex manner in which the fields of art and science intersected in nineteenth century America Long awaited this reevaluation of one of the major figures of nineteenth century American art will prove to be a seminal text in the fields of art history and American studies

Photography and the Non-Place Jim Brogden,2019-01-31 This book presents a critical and aesthetic defence of non place as an act of cultural reclamation Through the restorative properties of photography it re conceptualises the cultural significance of non place The non place is often referred to as wasteland and is usually avoided The sites investigated in this book are located where access and ownership are often ambiguous or in dispute they are places of cultural forgetting Drawing on the author s own photographic research led practice as well as material from photographers such as Ed Ruscha Joel Sternfeld and Richard Misrach this study employs a deliberately allusive intertextuality to offer a unique insight into the contested notions surrounding landscape representation Ultimately it argues that the non place has the potential to reveal a version of England that raises questions about identity loss memory landscape valorisation and perhaps most importantly how we are to arrive at a more meaningful place

**Expanded Painting** Mark Titmarsh,2017-08-24 The relevance of painting has been questioned many times over the last century by the arrival of photography installation art and digital technologies But rather than accept the death of painting Mark Titmarsh traces a paradoxical interface between this art form and its opposing forces to define a new practice known as expanded painting giving the term historical context theoretical structure and an important place in contemporary practice As the formal boundaries tumble the being of painting expands to become a kind of total art incorporating all other media including sculpture video and performance Painting is considered from three different perspectives ethnology art theory and ontology From an ethnological point of view painting is one of any number of activities that takes place within a culture In art theory terms painting is understood to produce objects of interest for humanities disciplines Yet painting as a medium often challenges both its object and image status expanding and creating hybrid works between painting objects screen media and text Ontologically painting is understood as an object of aesthetic discourse that in turn reflects historical states of being Thus Expanded Painting delivers a new kind of saying a post aesthetic discourse that is attuned to an uncanny tension between the presence and absence of painting
