during the education and is an essential part of the training towards becoming a professional There is a large number of different terms for these types of projects capstone project senior project final year project B Sc M Sc thesis project etc In this book we will use the term thesis project and in some cases for the sake of simplicity just project This book focuses on thesis projects within the computing discipline Thus the type of project discussed in this book is in line with the capstone format described in the ACM IEEE Computing Curricula 2001 Computer Science p 53 an alternative capstone format is a research experience that includes some original work a review of the scientific literature and an investigation of a proposed solution f lowed by a scientific paper and or an oral presentation of the results It is important to remember that these are undergraduates and be realistic about the amount and quality of research expected Even so it may be more worthwhile to expose outstanding students to the challenges of research than to have them design and build yet another program In this book we present a process for conducting thesis projects with the resear orientation described in the quote above
