Olsson,Björn Lundell,2013-03-09 Don t wait for someone to write a book you want to read write it yourselfl This was the message we received when we asked around for a book that described final year projects for computer science and information systems In this book we have gathered our experiences of conducting and supervising final year projects in computer science and information systems In this book we present a process for conducting final year projects This process was developed at the University of Skovde Sweden It has been applied successfully to a wide spectrum of projects with many different subject areas and styles of project Typical subject areas have included for example artificial intelligence theoretical computer science databases data communication distributed systems human computer interaction operating systems real time systems software engineering systems analysis and technology transfer The styles of projects have been both theoretical and more empirically oriented and have included both science and technology oriented projects It is our hope that this book will be a valuable companion to the three actors involved in a final year project student supervisor and examiner In addition to the general descriptions and advice provided in this book we want to emphasise that it is important for students to find out the exact requirements at the department where the project is undertaken May 2002 Mikael Berndtsson Jorgen Hansson Bjorn Olsson Bjorn Lundell Acknowledgements This book would not have been possible without the support ofa number of people The Business Student's Guide to Study and Employability Peter Morgan,2020-11-18 Written in response to the pressures on universities to produce highly skilled and work ready graduates and intended to map across a three year business course this book covers essential skills from study presentation and leadership to practical advice on securing that all important job after university A number of hands on learning aids feature throughout including Skills self assessment tables For You to Do Integration and Application Interview questions This second edition has been thoroughly updated and is complemented by a companion website featuring a range of tools and resources for lecturers and students including an Instructor s Manual and PowerPoint slides answers and guidance on skills assessment tasks templates and examples to download as well as additional online chapters on topics such as testing assessment and alternative options for graduates Suitable for all students taking a business degree Managerial Communication Jennifer R. Veltsos,Geraldine E. Hynes,2024-08-22 Managerial Communication focuses on communication skills and strategies that managers need to be successful in today s workplace Known for its holistic overview of communication and focus on managerial competencies it continues to be the market leader in the field The Ninth Edition provides coverage of current topics like managing hybrid and virtual teams ChatGPT and artificial intelligence and empathic listening Thesis Projects Mikael Berndtsson,Jörgen Hansson,B. Olsson,Björn Lundell,2007-10-30 Any B Sc or M Sc study programme in the computing discipline typically ends with a capstone project A capstone project builds and tests the skills and the knowledge acquired

during the education and is an essential part of the training towards becoming a professional There is a large number of different terms for these types of projects capstone project senior project final year project B Sc M Sc thesis project etc In this book we will use the term thesis project and in some cases for the sake of simplicity just project This book focuses on thesis projects within the computing discipline Thus the type of project discussed in this book is in line with the capstone format described in the ACM IEEE Computing Curricula 2001 Computer Science p 53 an alternative capstone format is a research experience that includes some original work a review of the scientific literature and an investigation of a proposed solution f lowed by a scientific paper and or an oral presentation of the results It is important to remember that these are undergraduates and be realistic about the amount and quality of research expected Even so it may be more worthwhile to expose outstanding students to the challenges of research than to have them design and build yet another program In this book we present a process for conducting thesis projects with the resear orientation described in the quote above
