"Multiplication Is for White People" Lisa Delpit, 2012-03-20 From the MacArthur Award winning education reformer and author of the bestselling *Other People's Children* a long awaited new book on how to fix the persistent black white achievement gap in America's public schools As MacArthur Award winning educator Lisa Delpit reminds us and as all research shows there is no achievement gap at birth In her long awaited second book Delpit presents a striking picture of the elements of contemporary public education that conspire against the prospects for poor children of color creating a persistent gap in achievement during the school years that has eluded several decades of reform Delpit's bestselling and paradigm shifting first book *Other People's Children* focused on cultural slippage in the classroom between white teachers and students of color Now in *Multiplication Is for White People* Delpit reflects on two decades of reform efforts including No Child Left Behind standardized testing the creation of alternative teacher certification paths and the charter school

movement that have still left a generation of poor children of color feeling that higher educational achievement isn't for them. In chapters covering primary, middle, and high school as well as college, Delpit concludes that it's not that difficult to explain the persistence of the achievement gap. In her wonderful trademark style, punctuated with telling classroom anecdotes and informed by time spent at dozens of schools across the country, Delpit outlines an inspiring and uplifting blueprint for raising expectations for other people's children based on the simple premise that multiplication and every aspect of advanced education is for everyone.

Social Issues in Living Color Arthur W. Blume, 2017-02-16

Offering fresh and exciting approaches to solving global problems, this book creatively views challenging social issues through the lens of racial and ethnic psychology. As the demographic makeup of the American population continues to evolve, understanding and addressing the psychological needs of ethnic minorities in the United States becomes more important to the overall health and well-being of society. This three-volume set is the first publication to explicitly tackle social issues from the perspective of racial and ethnic psychology. It uniquely presents racial and ethnic psychological perspectives on topics such as media, criminal justice, racism, climate change, gender bias, and health and mental health disparities. Volume one introduces readers to the basic scientific concepts of racial and ethnic minority psychology and then examines the intersectionality of race, ethnicity, gender, and sexual orientation. It also addresses how race and ethnicity affect communication styles, leadership styles, and media. The second volume discusses the experiences of individuals within racial and ethnic minorities, including overt racism, covert racism, and colonialism, and addresses how ethnic minority psychology plays a role in our educational system, poverty, global climate change, and sustainability. The third volume covers ethics in health and research, considers the causes of health and mental health disparities, and identifies diversity initiatives that can improve the health and well-being of all citizens, not just racial and ethnic minority citizens.
