Kamikaze Peter C. Smith,2014-11-28 In this brand new publication from eminent historian Peter C Smith we are regaled with the engaging and often incredibly disturbing history of the Kamikaze tradition in Japanese culture Tracing its history right back to the original Divine Wind major natural typhoons that saved Japan from invaders in ancient history Smith explores the subsequent resurrection of the cult of the warrior in the late nineteenth century He then follows this tradition through into the Second World War describing the many Kamikaze suicide attacks carried out by the Emperor s pilots against Allied naval vessels in the closing stages of the Pacific campaign These pilots were at the mercy of an overriding cultural tradition that demanded death over defeat capture or perceived shame Despite often being under trained and ill prepared psychologically for the sacrifices they were about to make they were nonetheless expected to make them The dedication of sacrifice for the Emperor and the Nation is explored by dissecting the traces left behind by these pilots Smith provides a detailed look at the heartbreak of the pilot s families and the men themselves the notes they left and the effects on

those who did not share their philosophy The views of individuals under attack are also included in this balanced history Countless attacks carried out over the Philippine Islands including the sinking of the St Lo are analyzed and the Okinawa campaign is afforded particularly strong coverage with the sinking of HMAS Australia explored in detail The collective sacrifice is then summed up with reflections from survivors on both sides appraising events in a humane historical context A detailed appendices then follows featuring units formed sorties mounted ships sunk and damages inflicted

Fortnight of Infamy John Burton, 2013-09-23 While America was preoccupied with the aftermath of Pearl Harbor an even greater tragedy was unfolding across Southeast Asia From Wake Island to Burma the Empire of Japan opened the largest front in the history of warfare an aircraft driven invasion of colonial possessions throughout the Far East that crumbled the entire Western imperial legacy of the nineteenth century Events during the first two weeks of battle set the stage for the greatest military defeats America and Great Britain would suffer during any conflict This book offers the first comprehensive overview of the collapse of Allied air forces during the period between December 8 and 24 1941 Written for a wide audience it gives readers both a cockpit view of the desperate actions that took place and an understanding of why such heavy losses occurred The narrative account includes enough detail and analysis to hold the interest of serious students of Pacific War aviation and enough exciting descriptions of air combat to attract those with little knowledge of the subject Explaining how and why the Japanese were able to win a quick victory John Burton points to U S failures in the concepts for employment of airpower and a significant underestimation of Japanese air mindedness and aviation capabilities failures that resulted in the loss or surrender of more than 200 000 troops at Bataan and Singapore

Peter C.

Smith,2007-03-28 The Blackburn Skua was the first monoplane to be designed and built for the Royal Navy in the 1930s As a result of continued debate it became a compromise between the Navy's desire for a carrier based dive bomber and RAF's preference for a fighter Despite being the first to shoot down a Luftwaffe aircraft in World War II early operations in Norway found the type woefully inadequate as a fighter As a dive bomber the Royal Navy put the design to good use from the outset of WWII It was involved with the hunt for the Graf Spee sunk the major warship Koln suffered with great loss in an attack on the Scharnhorst helped to keep the German advance at bay during the Dunkirk evacuation and attacked the French rogue battleship Richelieu in the Mediterranean This book relates how the final design was created how the dive bombing technique was developed and perfected by naval pilots and traces the wartime operational career of the type with many first hand accounts *Task Force 58* Rod Macdonald,2023-01-04 The new breed of American fast aircraft carriers could make

thirty three knots and each carried almost 100 strike aircraft Brought together as Task Force 58 also known as the Fast Carrier Task Force this awesome armada at times comprised more than 100 ships carrying more than 100 000 men afloat By 1945 more than 1 000 combat aircraft fighters dive and torpedo bombers could be launched in under an hour The fast carriers were a revolution in naval warfare it was a time when naval power moved away from the big guns of the battleship to air power projected at sea Battleships were eventually subordinated to supporting and protecting the fast carriers of which at its peak Task Force 58 had a total of seventeen This book covers the birth of naval aviation the appearance of the first modern carriers in the 1920s through to the famous surprise six carrier Kido Butai Japanese raid against Pearl Harbor on 8

December 1941 and then the early US successes of 1942 at the Battles of the Coral Sea and Midway The fast carriers allowed America in late 1942 and early 1943 to finally move from bitter defence against the Japanese expansionist onslaught to mounting her own offensive to retake the Pacific Task Force 58 swept west and north from the Solomon Islands to the Gilbert and Marshall Islands neutralising Truk in Micronesia and Palau in the Caroline islands before the vital Mariana Islands operations the Battle of Saipan the first battle of the Philippine Sea and the Great Marianas Turkey Shoot The strikes by Task Force 58 took Allied forces across the Pacific to the controversial Battle of Leyte Gulf and to Iwo Jima and Okinawa Task Force 58 had opened the door to the Japanese home islands themselves allowing US bombers to finally get close enough to launch the devastating nuclear bombing raids on Hiroshima and Nagasaki Task Force 58 participated in virtually all the US Navy's major battles in the Pacific theatre during the last two years of the war Having spent many years investigating naval shipwrecks across the Pacific many the result of the devastating effectiveness of Task Force 58 diver and shipwreck author Rod Macdonald has created the most detailed account to date of the fast carrier strike force the force that brought Japan to its knees and brought the Second World War to its crashing conclusion *Archaeological Survey and Inventory of Submerged Cultural Resources in the Lagoon of Kwajalein Atoll* Matthew B.
