Scale Of Imprisonment:

The Scale of Imprisonment Franklin E. Zimring, Gordon J. Hawkins, Gordon Hawkins, 1993-09 Two of the nation's foremost criminal justice scholars present a comprehensive assessment of the factors behind the growth and subsequent overcrowding of American prisons By critiquing the existing scholarship on prison scale from sociology and history to correctional forecasting and economics they both reveal that explicit policy changes have had little influence on the increases in imprisonment in recent years and analyze whether it is possible to place limits effectively on prison population The Scale of Imprisonment has an exceptionally well designed literature review of interest to public policy criminal justice and public law scholars Its careful review analysis and critique of research is stimulating and inventive American Political Science Review The authors frame our thoughts about the soaring use of imprisonment and stimulate our thinking about the best way we as criminologists can conduct rational analysis and provide meaningful advice Susan Guarino Ghezzi Journal of Quantitative Criminology Zimring and Hawkins bring a long tradition of excellent criminological scholarship to the seemingly intractable problems of prisons prison overcrowding and the need for alternative forms of punishment J C Watkins Jr Choice

than seven fold to over two million people including vastly disproportionate numbers of minorities and people with little education For some racial and educational groups incarceration has become a depressingly regular experience and prison culture and influence pervade their communities Almost 60 percent of black male high school drop outs in their early thirties have spent time in prison In Punishment and Inequality in America sociologist Bruce Western explores the recent era of mass incarceration and the serious social and economic consequences it has wrought Punishment and Inequality in America dispels many of the myths about the relationships among crime imprisonment and inequality While many people support the increase in incarceration because of recent reductions in crime Western shows that the decrease in crime rates in the 1990s was mostly fueled by growth in city police forces and the pacification of the drug trade Getting tough on crime with longer sentences only explains about 10 percent of the fall in crime but has come at a significant cost Punishment and Inequality in America reveals a strong relationship between incarceration and severely dampened economic prospects for former inmates Western finds that because of their involvement in the penal system young black men hardly benefited from the economic boom of the 1990s Those who spent time in prison had much lower wages and employment rates than did similar men without criminal records The losses from mass incarceration spread to the social sphere as well leaving one out of ten young black children with a father behind bars by the end of the 1990s thereby helping perpetuate the damaging cycle of broken families poverty and crime The recent explosion of imprisonment is exacting heavy costs on American society and exacerbating inequality Whereas college or the military were once the formative institutions in young men s lives prison has increasingly usurped that role in many communities Punishment and Inequality in America profiles how the growth in incarceration came about and the toll it is taking on the social and economic fabric of many American communities
