chapters combines literary evidence on Scandinavia's politics, kings and other rulers with archaeological, documentary, toponymical and linguistic evidence. The picture that emerges is one of surprisingly stable rulership institutions, sites and myths while control of them was contested between individuals, dynasties and politics. While in the early centuries Scandinavia was integrated in Germanic Europe, profound societal and cultural changes in 6th century Scandinavia and the Christianisation of Continental and English kingdoms set northern kingship on a different path. The pagan heroic warrior ethos essential to kingship was developed and refined only to recur overseas embodied in 9th-10th century Vikings. Three chapters on a hitherto unknown masonry royal manor at Avaldsnes in western Norway excavated 2017 concludes this volume with discussions of the late medieval peak of Norwegian kingship and its eventual downfall in the late 14th century. This book's discussions and results are relevant to all scholars and students of 1st millennium Germanic kingship, politics and societies.

*Arabic L2 Interlanguage* Ghassan Husseinali, 2015-10-23. Arabic L2 Interlanguage is a significant and timely addition to the field of Second Language Acquisition, providing valuable insight into the development of interlanguage, the interim language of early beginners in learners of Arabic. This book clearly establishes what interlanguage is and why it should form an important part of foreign language teaching. Presents the reader with a sequence in which six English speaking learners of Arabic acquire the language. Makes use of the rich morphological and syntactic property of Arabic to offer a new perspective on the field of Second Language Acquisition. Arabic L2 Interlanguage contributes directly towards building a more comprehensive theoretical framework for explaining how L2s are acquired. It will be key text for SLA scholars as well as an important resource for graduate students in Linguistics and Foreign Language Teaching.

**Contemporary Approaches to Second Language Acquisition** María del Pilar García Mayo, María Junkal Gutierrez Mangado, María Martínez Adrián, 2013-02-19. Second language acquisition (SLA) is a field of inquiry that has increased in importance since the 1960s. Currently, researchers adopt multiple perspectives in the analysis of learner language, all of them providing different but complementary answers to the understanding of oral and written data produced by young and older learners in different settings. The main goal of this volume is to provide the reader with updated reviews of the major contemporary approaches to SLA, the research carried out within them, and wherever appropriate, the implications and/or applications for theory, research and pedagogy that might derive from the available empirical evidence. The book is intended for SLA researchers as well as for graduate MA/PhD students in SLA research, applied linguistics and linguistics, as the different chapters will be a guide in their research within the approaches presented. The volume will also be of interest to professionals from other fields interested in the SLA process and the different explanations that have been put forward to account for it.

Understanding Second Language Processing Bronwen Patricia Dyson, Gisela Håkansson, 2017-05-24. This

book aims to help researchers and teachers interested in language processing and Processability Theory PT to understand this theory and its applications PT is an influential account of second language processing which hypothesizes that due to the architecture of language processing learners acquire second languages in developmental stages This book lays out PT's predictions and research on the development of diverse target languages particularly English and Scandinavian languages by learners of various categories It discusses the typological issues facing PT and its contribution to an understanding of variation and cognitive constraints on pedagogy However the book also raises a critical eye to the literature which after almost twenty years of evolution requires explanation clarification and in some cases extension Why do some phenomena belong to different stages in different languages Why are important types of variation underrepresented Is teaching as constrained as proposed in PT
