**Women, Love, and Commodity Culture in British Romanticism** Professor Daniela Garofalo, 2013-05-28 Offering a new understanding of canonical Romanticism Daniela Garofalo suggests that representations of erotic love in the period have been largely misunderstood Commonly understood as a means for transcending political and economic realities love for several canonical Romantic writers offers instead a contestation of those realities Garofalo argues that Romantic writers show that the desire for transcendence through love mimics the desire for commodity consumption and depends on

the same dynamic of delayed fulfillment that was advocated by thinkers such as Adam Smith. As writers such as William Blake, Lord Byron, Sir Walter Scott, John Keats, and Emily Brontë engaged with the period's concern with political economy and the nature of desire, they challenged stereotypical representations of women either as self-denying consumers or as intemperate participants in the market economy. Instead, their works show the importance of women for understanding modern economics, with women's desire conceived as a force that not only undermines the political economy's emphasis on productivity, growth, and perpetual consumption but also holds forth the possibility of alternatives to a system of capitalist exchange.

Feminism Confronts Homo Economicus Martha Fineman, Terence Dougherty, 2018-08-06

The essays in this volume confront the inroads that economics has made into the legal academy. Law and Economics uses principles of neoclassical economics to develop laws and social policies that maintain if not bolster current allocations of power. From the Introduction: The Law and Economics school has had a significant impact on the legal and governmental landscape in the United States. It posits a perfectly rational economic man, *homo economicus*, who is unconstrained by familial and communal ties and who can and should make decisions solely in light of considerations of economic value. *Feminism Confronts Homo Economicus* offers a major intervention in debates about how law has come under the influence of economic principles. Drawing on the latest thinking in the fields of feminist legal theory, critical legal studies, and feminist economics, the essays critique the notion that legal and policy decisions should be made solely through the lens of economics. While the contributors question the wholesale incorporation of the neoclassical economic model into legal analysis, they do not all discard economic analysis and theory. Situated at the intersection of feminism, law, and economics, *Feminism Confronts Homo Economicus* will appeal to scholars and students of these disciplines as well as policy analysts and social theorists interested in family, education, labor, and welfare.

*Why Love Hurts* Eva Illouz, 2013-05-20

Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us; being heartbroken when we're abandoned by a lover; engaging in Sisyphean internet searches; coming back lonely from bars, parties, or blind dates; feeling bored in a relationship that is so much less than we had envisaged. These are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a

fundamental transformation in the ecology and architecture of romantic choice The samples from which men and women choose a partner the modes of evaluating prospective partners the very importance of choice and autonomy and what people imagine to be the spectrum of their choices all these aspects of choice have transformed the very core of the will how we want a partner the sense of worth bestowed by relationships and the organization of desire This book does to love what Marx did to commodities it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors

increasingly efficient algorithms that power these sites dating has been transformed from a daunting transaction based on scarcity to one in which the possibilities are almost endless Now anyone young old straight gay and even married can search for exactly what they want connect with more people and get more information about those people than ever before As journalist Dan Slater shows online dating is changing society in more profound ways than we imagine He explores how these new technologies by altering our perception of what s possible are reconditioning our feelings about commitment and challenging the traditional paradigm of adult life Like the sexual revolution of the 1960s and 70s the digital revolution is forcing us to ask new questions about what constitutes normal Why should we settle for someone who falls short of our expectations if there are thousands of other options just a click away Can commitment thrive in a world of unlimited choice Can chemistry really be quantified by math geeks As one of Slater s subjects wonders What s the etiquette here Blending history psychology and interviews with site creators and users Slater takes readers behind the scenes of a fascinating business Dating sites capitalize on our quest for love but how do their creators ideas about profits morality and the nature of desire shape the virtual worlds they ve created for us Should we trust an industry whose revenue model benefits from our avoiding monogamy Documenting the untold story of the online dating industry s rise from ignominy to ubiquity beginning with its early days as computer dating at Harvard in 1965 Slater offers a lively entertaining and thought provoking account of how we have for better and worse embraced technology in the most intimate aspect of our lives
