## Scattering Eva:

Wax Crystal Control - Nanocomposites - Stimuli-Responsive Polymers ,2007-11-03      **Scattering Eva James**  
Sheard,2005 In this remarkably assured and elegant first collection James Sheard tackles the subject of the individual in European history Ideologies and upheavals old and new pervade the environment of his poetry and what emerge are those moments when his characters connect however briefly with the forces that surround them      Dammtor James  
Sheard,2010-09-02 Dammtor is the old city gate and now the centre of ground transport for the great port of Hamburg In James Sheard s second collection it is a station for midnights hitched up on stone legs hollow with sunken light a hub for the damaged and deracinated These precise wounded poems draw the reader through this desolate landscape through sexual longing sexual violence bereavement and the beginning of hope through the birth of a son Dammtor restlessly narrates the condition of maleness looking for truth and music in a voice which is both urgent and unadorned The poems are spoken in solitary places late night stations hotel lobbies car rides and empty woodland but they are addressed to the living the missing the dead and the just born Personal and political narratives leak into the spaces of the poems to form a strange light which has something of the hallucinatory clarity of translations The voice might be by turn elegaic vicious obsessive or bewildered as it explores its topic but it is accompanied by an eye which will not or perhaps cannot blink Finding tenderness amid brutality Dammtor is a highly accomplished and remarkable collection      **Resonant Tunneling in Semiconductors** Leroy L. Chang,E. E. Mendez,C. Tejedor,1991 Forty nine contributions from the May 1990 meeting begin with an introduction followed by discussions of different material systems with various band structure effects Properties associated with dynamic processes are then described including electron scattering and charge storage Specific situati      *Biennial Report of the Secretary of State* Kansas. Polymer Blends and Mixtures D.J. Walsh,J.S. Higgins,A. Maconnachie,2012-12-06 A couple of years ago a small group of people began discus sing the possibility of running an advanced summer school in the area of polymer blends There had been a number of recent advan ces in this field and given the considerable interest in these new polymeric materials we thought such a meeting would be well received both by industry and academia We wanted it to contain a wide range of background

science and technology and also up to date recent advances in the field It became clear as the discussion progressed that the experts in the field were scattered over the length and breadth of Europe and North America and thus the cost of bringing them together for a summer school would necessitate a high registration fee which would deter many of the research workers we wished to attract The NATO Advanced Study Institute programme enables a subject to be covered in depth and by giving generous funds to cover lecturers costs ensures that a wide spectrum of research workers can attend We decided to apply to NATO and this book contains the results of our request The ASI was funded under the Double Jump Programme which is not a new Olympic event but a way of supporting courses on subjects of direct industrial interest The Institute was also backed by donations from several companies and approximately half those attending were from industrial organisations

**Laser Induced Damage in Optical Materials** ,1999      **Molecular Spectra and Molecular Structure K.**

Huber,2013-06-29 Since the publication in 1950 of Vol I Spectra of Diatomic Molecules of Molecular Spectra and Molecular Structure much progress has been made in the field While there have been some important refinements in the theory of diatomic molecular spectra most of the advances have been in the further exploration of individual spectra Not only has the number of molecules about which some spectroscopic data are available been increased by a factor of 2 to 3 but also the spectroscopic information about the molecules known in 1950 has been vastly extended This is due to the observation of new electronic states about three times as many as known before the enormous improvements in the accuracy of the constants of the states known in 1950 and the determination of higher order constants In view of the increasing use of spectroscopic information on diatomic molecules in other fields of physics in chemistry and in astrophysics it appeared desirable to prepare an up to date version of the table of molecular constants in the appendix of Vol I This updating proved to be far more time consuming than originally anticipated and it is only now 10 years that we are able to present such a table which instead after its initiation of the original 80 pages plus 30 pages of bibliography now fills a volume of 700 pages In the interest of economy and unlike the original version the new table has been produced by photo offset from the final manuscript      **Biennial**

**Report of the Secretary of State of the State of Kansas** Kansas. Secretary of State,1916      Adventures in the Play-Ritual Continuum Audun Kjus,Jakob Löfgren,Cliona O'Carroll,Simon Poole,Ida Tolgensbakk,2025-02-21 The junctions between play and ritual are many and complex Play is for fun and joy but it also demands a total commitment and serious respect for rules Rituals involve nearly endless varieties of social arrangements and can truly transform people but they also include improvisation testing and pretending Adventures in the Play Ritual Continuum explores the connectivity between the playful and the ritualized through a fresh theoretical perspective highlighting the creative messiness and the cultural paradoxes such intersections allow The chapters span topics such as hen parties marriage proposals ash scatterings extreme sports races football fans computer game festivals celebrations of fandom migration heritages and antiracist protests While the case studies are selected to show a range of diversity with various mergings of play game ritual ceremony rite and

ritualizing the introductory and concluding discussions offer sharpened perspectives on common aspects Following these excursions through the play ritual continuum will be enjoyable for readers interested in how people make sense of their own existence and profitable for scholars in folklore anthropology religion pedagogy cultural studies and social sciences and humanities more generally *Nuclear Science Abstracts* ,1964 **Phase Behavior of Polymer Blends** Karl
