 John Opie, 2008-01-01 Virtual America traces the complex relationship between Americans technology and their environment
 as it has unfolded over the past several centuries Throughout history Americans have constructed mental pictures of unique
 places such as the American West that have taken on more authority than the actual gritty landscapes This disconnect from
 reality is magnified by the new world of virtual realities on the computer screen where personal immersion in interactive
 simulations becomes the default environment Virtual America identifies the connections or lack thereof between our
 individual selves an American identity and the geography out there John Opie examines what he calls First Nature the
 natural world Second Nature metropolitan infrastructure built environment and Third Nature virtual reality in cyberspace He
 also explores how Americans have historically dreamed about a better life in daily ordinary existence and then fulfilled it
 through the Engineered America of our built environment the Consumer America of material well being and the Triumphant
 America of our conviction that we are the world's exceptional model But these dream worlds have also encouraged
 placelessness and thus indifference to our dwelling in home ground Finally Opie explores Last Nature a sense of place and
 argues that when we identify an authentic place we can locate authenticity of self a reification of place and self by their
 connectedness **North American Odyssey** Craig E. Colten, Geoffrey L. Buckley, 2014-03-27 This groundbreaking volume
 offers a fresh approach to conceptualizing the historical geography of North America by taking a thematic rather than a
 traditional regional perspective Leading geographers building on current scholarship in the field explore five central themes
 Part I explores the settling and resettling of the continent through the experiences of Native Americans early European

arrivals and Africans Part II examines nineteenth century European immigrants the reconfiguration of Native society and the internal migration of African Americans Part III considers human transformations of the natural landscape in carving out a transportation network replumbing waterways extracting timber and minerals preserving wilderness and protecting wildlife Part IV focuses on human landscapes blending discussions of the visible imprint of society and distinctive approaches to interpreting these features The authors discuss survey systems regional landscapes and tourist and mythic landscapes as well as the role of race gender and photographic representation in shaping our understanding of past landscapes Part V follows the urban impulse in an analysis of the development of the mercantile city nineteenth and twentieth century planning and environmental justice With its focus on human environment interactions the mobility of people and growing urbanization this thoughtful text will give students a uniquely geographical way to understand North American history Contributions by Derek H Alderman Timothy G Anderson Kevin Blake Christopher G Boone Geoffrey L Buckley Craig E Colten Michael P Conzen Lary M Dilsaver Mona Domosh William E Doolittle Joshua Inwood Ines M Miyares E Arnold Modlin Jr Edward K Muller Michael D Myers Karl Raitz Jasper Rubin Joan M Schwartz Steven Silvern Andrew Sluyter Jeffrey S Smith Robert Wilson William Wyckoff and Yolonda Youngs

Pilgrimage to the National Parks Lynn Ross-Bryant, 2013 National Parks America's Best Idea were from the first seen as sacred sites embodying the God given specialness of American people and American land and from the first they were also marked as tourist attractions The inherent tensions between these two realities ensured the parks would be stages where the country's conflicting values would be performed and contested As pilgrimage sites embody the values and beliefs of those who are drawn to them so Americans could travel to these sacred places to honor experience and be restored by the powers that had created the American land and the American enterprise This book explores the importance of the discourse of nature in American culture arguing that the attributes and symbolic power that had first been associated with the new world and then the frontier were embodied in the National Parks Author Ross Bryant focuses on National Parks as pilgrimage sites around which a discourse of nature developed and argues the centrality of religion in understanding the dynamics of both the language and the ritual manifestations related to National Parks Beyond the specific contribution to a richer analysis of the National Parks and their role in understanding nature and religion in the U S this volume contributes to the emerging field of religion and the environment larger issues in the study of religion e g cultural events and the spatial element in meaning making and the study of non institutional religion
