*Scenographic Imagination* Darwin Reid Payne, 1993 In this enlarged and thoroughly revised third edition of his widely used text Darwin Reid Payne explores the principles and philosophies that shape the visual elements of theatre Payne sets out to discover who scenographers are and to define their responsibilities He sees scenographers as not merely craftspersons but artists with a special vision that spans all the arts Such artists are in a position to extend and amplify underlying meanings of the production The proper goal of beginning scenographers according to Payne is one day to be able to approach the job as artists in full command of their craft Payne seeks to instill in beginning scenographers a basic core of knowledge an understanding of theatre history and the development of drama a knowledge of art history and an understanding of periods and styles of architecture painting sculpture furnishings and costume and a familiarity with the principles techniques and materials of pictorial and three dimensional design This new edition contains 248 illustrations 38 more than the second edition Payne s goal certainly is to teach students what to do and how to do it equally important however is Payne s view that scenographers must know why To Payne Scenography is an art whose scope is nothing less than the whole world outside the theatre Scenographers must read not only in their own field but in others as well Payne has incorporated into his text many suggestions for outside readings quoting passages and even entire chapters from important works Stressing research Payne argues that without knowledge of the literature of their own and related arts scenographers cannot grow And that is the emphasis of this book to present aspiring scenographers with an approach and a set of concepts that will enable them to grow Toward that end Payne establishes five priorities the first of which is to develop in students what he calls time vision or the ability to see the historical past as a living place with living inhabitants The second priority is to bring about an awareness that allows students to see beneath the surface of objects and events Third students must be helped to recognize and appreciate the difference between the concept of space as it exists outside the theatre and the concept of space as it is used within the theatre The fourth priority is to ingrain in students an understanding of the importance of imagery to the scenographer and the final priority is to teach those technical skills necessary to carry out the concepts of the scenographer

The Scenographic Imagination Darwin Reid Payne, 1981 This is a revised expanded version of Payne s *Design for the Stage First Steps* the book Choice characterized as An excellent text a refreshingly innovative approach to theatrical design with an artistic theatrical and historical focus rather than the technical craft orientation found in most textbooks Payne seeks to instill in beginning scenographers a basic core of knowledge theater history and the development of drama art history and an understanding of periods and styles of architecture painting sculpture furnishing and costume and the principles techniques and materials in pictorial and three dimensional design He has incorporated into his text many suggestions for outside readings quoting passages and even entire chapters from important works He stresses research arguing that the scenographer cannot grow without knowledge of the literature of his own and related arts John
