The Holy Roman Empire, Reconsidered Jason Philip Coy, Benjamin Marschke, David Warren Sabean, 2010-10-01 The Holy Roman Empire has often been anachronistically assumed to have been defunct long before it was actually dissolved at the beginning of the nineteenth century The authors of this volume reconsider the significance of the Empire in the sixteenth seventeenth and eighteenth centuries Their research reveals the continual importance of the Empire as a stage and audience for symbolic performance and communication as a well utilized problem solving and conflict resolving supra governmental institution and as an imagined political religious and cultural world for contemporaries This volume by leading scholars offers a dramatic reappraisal of politics religion and culture and also represents a major revision of the history of the Holy Roman Empire in the early modern period

Lordship and State Transformation Stephan Sander-Faes, 2024-12-17 Although state transformation continuous struggle and bargaining between rulers and their subjects producing an unpredictable variety of political structures is often overlooked the process is crucial in assessing the organizational development of early modern composite monarchies and deserves further investigation In Austria the monarchy's emergence as a great power required it to overcome several successive crises that culminated in the decades around 1700 The Habsburgs succeeded more by adjusting relations between Crown and lordships than through institution building This unusual interaction of state and non state actors resulted in an Austria that markedly deviated from the centralizing nation state exemplified by Britain or France The nascent Habsburg fiscal financial military regime transformed regional and local authority leading to armed conflict and causing disintegration of the administrative and social fabric From the mid seventeenth century onward power whether local or central or social or political would undergo enormous changes Grounded in extensive research into Czech archives and spanning an era from the Thirty Years War to the coronation of Charles VI *Lordship and State Transformation* delves into the complex transitions that characterized the first instance of a balance of power in Europe with a focus on its underresearched great power the Habsburg monarchy

Embodiments of Power Gary B. Cohen, Franz A. J. Szabo, 2008-07-01 The period of the baroque late sixteenth to mid eighteenth centuries saw extensive reconfiguration of European cities and their public spaces Yet this transformation cannot be limited merely to signifying a style of art architecture and decor Rather the

dynamism emotionality and potential for grandeur that were inherent in the baroque style developed in close interaction with the need and desire of post Reformation Europeans to find visual expression for the new political confessional and societal realities Highly illustrated this volume examines these complex interrelationships among architecture and art power religion and society from a wide range of viewpoints and localities From Krakow to Madrid and from Naples to Dresden cities were reconfigured visually as well as politically and socially Power in both its political and architectural guises had to be negotiated among constituents ranging from monarchs and high churchmen to ordinary citizens Within this process both rulers and ruled were transformed Europe left behind the last vestiges of the medieval and arrived on the threshold of the modern

More than Mere Spectacle Klaas Van Gelder, 2021-02-02 Across the medieval and early modern eras new rulers were celebrated with increasingly elaborate coronations and inaugurations that symbolically conferred legitimacy and

political power upon them Many historians have considered rituals like these as irrelevant to understanding modern governance an idea that this volume challenges through illuminating case studies focused on the eighteenth and nineteenth century Habsburg lands Taking the formal elasticity of these events as the key to their lasting relevance the contributors explore important questions around their political legal social and cultural significance and their curious persistence as a historical phenomenon over time

The End of Empires Michael Gehler,Robert Rollinger,Philipp Strobl,2022-11-21 The articles of this comprehensive edited volume offer a multidisciplinary global and comparative approach to the history of empires They analyze their ends over a long spectrum of humankind s history ranging from Ancient History through Modern Times As the main guiding question every author of this volume scrutinizes the reasons for the decline the erosion and the implosion of individual empires All contributions locate and highlight different factors that triggered or at least supported the ending or the implosion of empires This overall question makes all the contributions to this volume comparable and allows to detect similarities differences as well as inconsistencies of historical processes

faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axuality frontality and symmetry of the temple as viewed from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion **Die gerichtliche Psychopathologie** ,1882 **Lenau-Jahrbuch** ,1996
