Troy on Display Abigail Baker, 2019-10-03 This book explores what visitors saw at the Trojan exhibition and why its contents including treasure plain pottery and human remains captured imaginations and divided opinions When Schliemann's Trojan collection was first exhibited in 1877 no one had seen anything like it Schliemann claimed these objects had been owned by participants in the Trojan War and that they were tangible evidence that Homer's epics were true Yet these objects did not reflect the heroic past imagined by Victorians and a fierce controversy broke out about the collection's value and significance Schliemann invited Londoners to see the very unclassical objects on display as the roots of classical culture Artists poets historians race theorists bankers and humourists took up this challenge but their conclusions were not always to Schliemann's liking Troy's appeal lay in its materiality visitors could apply analytical techniques from aesthetic appreciation to skull measuring to the collection and draw their own conclusions This book argues for a deep examination of museum exhibitions as a constructed spatial experience which can transform how the past is seen This new angle on a famous archaeological discovery shows the museum as a site of controversy where hard evidence and wild imagination came together to form a lasting image of Troy

Mycenaean Civilization Bryan Feuer, 2004-03-16 Classical Greeks considered the Mycenaean civilization to be the basis of their glorious and heroic heritage but its material existence was not confirmed until the excavations of Heinrich Schliemann in the late nineteenth century In the ensuing years as with the field of archaeology in general emphasis has shifted from revealing monuments and finding treasure to dealing with less glamorous more scientifically oriented investigations concerning aspects such as social and political organization economic functions and settlement patterns With its more than 2000 entries this reference work serves as both an introduction to and a summary of the study of ancient Mycenaean civilization Considerably expanded from the first edition there are 500 new entries representing materials published since 1991 The largest part of the book is made up of annotated bibliography entries arranged topically with introductory material for each section The book also includes a general introduction to Mycenaean civilization a glossary and author place and subject indexes

A Brief History of Archaeology Nadia Durrani, Brian M. Fagan, 2016-06-17 This short account of the discipline of archaeology tells of spectacular discoveries and the colorful lives of the archaeologists who made them as well as of changing theories and current debates in the field Spanning over two thousand years of history the book details early digs as well as covering the development of archaeology as a multidisciplinary science the modernization of meticulous excavation methods during the twentieth century and the important discoveries that led to new ideas about the evolution of human societies A Brief History of Archaeology is a vivid narrative that will engage readers who are new to the discipline drawing on the authors extensive experience in the field and classroom Early research at Stonehenge in Britain

burial mound excavations and the exploration of Herculaneum and Pompeii culminate in the nineteenth century debates over human antiquity and the theory of evolution The book then moves on to the discovery of the world's pre industrial civilizations in Egypt Mesopotamia and Central America the excavations at Troy and Mycenae the Royal Burials at Ur Iraq and the dramatic finding of the pharaoh Tutankhamun in 1922 The book concludes by considering recent sensational discoveries such as the Lords of Sip n in Peru and exploring the debates over processual and postprocessual theory which have intrigued archaeologists in the early 21st century The second edition updates this respected introduction to one of the sciences most fascinating disciplines

Grekyan, 2017-10-31 This book presents papers written by colleagues of Professor Gregory E. Areshian on the occasion of his 65th birthday The range of topics includes Near Eastern Mediterranean and Armenian archaeology theory of interpretation in archaeology and art history interdisciplinary history historical linguistics art history and comparative mythology

Archaeology's Visual Culture Roger Balm, 2015-12-14 *Archaeology's Visual Culture* explores archaeology through the lens of visual culture theory The insistent visuality of archaeology is a key stimulus for the imaginative and creative interpretation of our encounters with the past Balm investigates the nature of this projection of the visual revealing an embedded subjectivity in the imagery of archaeology and acknowledging the multiplicity of meanings that cohere around artifacts archaeological sites and museum displays Using a wide range of case studies the book highlights how archaeologists can view objects and the consequences that ensue from these ways of seeing Throughout the book Balm considers the potential for documentary images and visual material held in archives to perform cultural work within and between groups of specialists With primary sources ranging from the mid nineteenth to the early twenty first century this volume also maps the intellectual and social connections between archaeologists and their peers Geographical settings include Britain Cyprus Mesoamerica the Middle East and the United States and the sites of visual encounter are no less diverse ranging from excavation reports in salvage archaeology to instrumentally derived data sets and remote sensing imagery By forensically examining selected visual records from published accounts and archival sources enduring tropes of representation become apparent that transcend issues of style and reflect fundamental visual sensibilities within the discipline of archaeology
