Schmeiber Submachine Gun:

MP 38 and MP 40 Submachine Guns Alejandro de Quesada, 2014-07-20 Nazi Germany's MP 38 and MP 40 submachine guns are among World War II's most recognizable weapons. Portable and with folding stocks, both were widely issued to airborne troops and became the hallmark of Germany's infantry section and platoon leaders. A million were produced during the conflict and many found their ways into the hands of paramilitary and irregular forces from Israel to Vietnam after the war. Featuring specially commissioned full color artwork and period and close up photographs, this is the story of the origins, combat use and lasting influence of two of World War II's most famous firearms. The Suomi Submachine Gun Leroy Thompson, 2017-04-07 Entering service in 1931, the 9x19mm Suomi KP 31 submachine gun saw extensive combat with Finnish troops during their fight against Soviet forces in 1939-44. It was also manufactured under licence in Switzerland, Denmark and Sweden and remained in Finnish service until the 1980s, an indication of its durability. Rugged and accurate, the Suomi was a favourite with Finnish ski troops who would strike from ambush, cutting down Soviet troops then skiing away into the woods. Initially used by the Finns as a light machine gun at infantry squad level, it eventually became a dedicated submachine gun and, since it had been designed to be more accurate than the typical SMG, it was often even used as a sniping weapon or to supplement longer ranged rifles such as the Mosin Nagant. Featuring first hand accounts and specially commissioned colour artwork, this is the story of one of World War II's most distinctive and respected infantry weapons. The Sterling Submachine Gun Matthew Moss, 2018-11-29 Designed by a motorcycle racer turned small arms engineer, George Patchett, the submachine gun that eventually became known as the Sterling was developed during World War II. Some suggest it first saw action during Operation Infatuate with No 4 Commando before becoming fully adopted by the British Army in 1953 as the Sterling Machine Carbine L2A1. It was centre stage for many of Britain's post colonial conflicts from Malaya to Kenya and from Yemen to Northern Ireland. The silenced L34A1 Sterling Patchett entered service in 1966 and first saw action deep in the jungles of Vietnam in the hands of the elite special forces of Australia, New Zealand and the United States during prisoner snatches and reconnaissance patrols. Employing first hand accounts and painstaking technical analysis, this engaging account features carefully selected archive photography and specially commissioned colour artwork depicting the submachine gun that armed British and other forces for nearly 60 years. *The Combat Shotgun and Submachine Gun* Chuck Taylor, 1985 From one of America's top shooting instructors comes an analysis of two controversial, misunderstood and misemployed small arms: the combat shotgun and submachine gun. Hundreds of step by step photos, detail field testing of both arms, basic and advanced training drills, tactical rules, gun accessories and modifications. Techniques for weapon effectiveness include loading procedures, carrying and fighting positions and malfunction clearance drills. Automatic Weapons & Machine Guns Stephen Cohen, 2022-04-29 This book follows in the footsteps of many past conflicts from around the world and introduces the reader to the many different types of automatic machine gun weapons.

James Donovan, 2025-05-27 From the bestselling author of *Shoot for the Moon* and *A Terrible Glory* comes the dramatic story of the courageous paratroopers and glidermen of the 82nd Airborne who risked their lives to seize and secure a small centuries old bridge in France that played a pivotal role in the success of D Day In June 1944 German and American forces converged on an insignificant bridge a few miles inland from the invasion beaches If taken by the Nazis the bridge might have gone down in history as the reason the Allies failed on D Day The narrow road over it was each side's conduit to victory Continued Nazi control over the bridge near an old manoir known as La Fiere one of only two bridges in the region capable of supporting tanks and other heavy armor would allow the Germans to reinforce their defenses at Utah Beach one of the five landing areas chosen for Operation Overlord the Allied invasion of Nazi held Europe But because control of the bridge was also essential to moving U S troops inland and off the beach it could not simply be destroyed it had to be taken and held by the Allies This was part of the formidable mission of the 82nd Airborne whose lightly armed but superbly trained troopers had dropped behind and into German lines five hours before the seaborne assault on Utah While blocking enemy reinforcements they had to seize and secure avenues of approach from the beaches to the interior of Normandy including two bridges over the modest Merderet River and the key crossroads village of Sainte Mereglise Failure would give Hitler enough time and the opportunity to build up the resources necessary to defeat the invasion and turn the tide for the Nazis The village was taken early on D Day and the 82nd endured repeated attacks by much larger German forces But the bridge at La Fiere became a bloody three day standoff against tanks and artillery that culminated in a near suicidal charge across it and the narrow 500 yard causeway beyond straight into the teeth of a fierce German defense ordered to hold it to the last man
