The Intellectual Properties of Learning John Willinsky, 2018-01-02 Providing a sweeping millennium plus history of the learned book in the West John Willinsky puts current debates over intellectual property into context asking what it is about learning that helped to create the concept even as it gave the products of knowledge a different legal and economic standing than other sorts of property Willinsky begins with Saint Jerome in the fifth century then traces the evolution of reading writing and editing practices in monasteries schools universities and among independent scholars through the medieval period and into the Renaissance He delves into the influx of Islamic learning and the rediscovery of classical texts the dissolution of the monasteries and the founding of the Bodleian Library before finally arriving at John Locke whose influential lobbying helped bring about the first copyright law the Statute of Anne of 1710 Willinsky s bravura tour through this history shows that learning gave rise to our idea of intellectual property while remaining distinct from if not wholly uncompromised by the commercial economy that this concept inspired making it clear that today s push for marketable intellectual property threatens the very nature of the quest for learning on which it rests

Doctor Bernard de Gordon Luke E. Demaitre, 1980 *Medizingeschichte Mittelalter* Montpellier The Medieval Origins of the Legal Profession James A. Brundage, 2024-05-31 In the aftermath of sixth century barbarian invasions the legal profession that had grown and flourished during the Roman Empire vanished Nonetheless professional lawyers suddenly reappeared in Western Europe seven hundred years later during the 1230s when church councils and public authorities began to impose a body of

ethical obligations on those who practiced law James Brundage's *The Medieval Origins of the Legal Profession* traces the history of legal practice from its genesis in ancient Rome to its rebirth in the early Middle Ages and eventual resurgence in the courts of the medieval church By the end of the eleventh century Brundage argues renewed interest in Roman law combined with the rise of canon law of the Western church to trigger a series of consolidations in the profession New legal procedures emerged and formal training for proctors and advocates became necessary in order to practice law in the reorganized church courts Brundage demonstrates that many features that characterize legal advocacy today were already in place by 1250 as lawyers trained in Roman and canon law became professionals in every sense of the term A sweeping examination of the centuries long power struggle between local courts and the Christian church secular rule and religious edict *The Medieval Origins of the Legal Profession* will be a resource for the professional and the student alike
