School At Home Teach Your Own Child:

Teach Your Own John Holt, Pat Farenga, 2009-03-04 The classic and indispensable work on teaching children at home fully updated for today's new laws, new lifestyles and the growing new generation of homeschooling parents. Today more than one and a half million children are being taught at home by their own parents. In this expanded edition of the book that helped launch the whole movement, Pat Farenga has distilled John Holt's timeless understanding of the ways children come to understand the world and added up to the moment legal, financial and logistical advice. No parent even considering homeschooling should be without this wise and unique reference. Rather than proposing that parents turn their homes into miniature schools, Holt and Farenga demonstrate how ordinary parents can help children grow as social, active learners. Chapters on living with children, serious play, children and work, and learning difficulties will fascinate and encourage parents and help them enjoy each homeschool day. John Holt's warm understanding of children and his passionate belief in every child's ability to learn have made this book the bible of homeschooling families everywhere.

Home Schooling Frederick M. Lawrence, 2007 From left to right on the political spectrum there is at least one note of agreement: the nation's school system has not delivered universal quality education. Accordingly, debate has raged over how to rectify this situation. Should the government increase funding, encourage privatisation, or some of both? Another option though has emerged and is seemingly gaining popularity: home schooling. Citing both substandard education and displeasure with school environments and curricula, many parents have decided to teach their own children. Supporters say it is well within their rights to raise their children as they see fit and that at-home learning is superior to the public system. Detractors claim that home-schooled children are deprived of social interaction and the broad-based education provided by the system. Neither side wants to cede ground, making the issue of home schooling an integral part of a wider national debate on education. In this book, the specific topic of home schooling is presented from all relevant sides to give a complete picture of the present status of the issue and its potential for future resolution. Following this overview is a thorough and carefully selected bibliography of literature about home schooling from all viewpoints. Easy access to this important resource is then provided via author title and subject indexes.

Homeschooling High School Shirley Erwee, 2014-08-28 Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions.
