Policy Entrepreneurs and School Choice Michael Mintrom, 2000-04-26 Rapid and controversial the spread of school choice initiatives across the United States has radically changed political debate about public education In this book Michael Mintrom explores the complex world of open enrollment policies charter schools and voucher plans to reveal how and why school choice has become a major issue and he draws important conclusions about how innovative individuals can spur significant change in the policy arena Policy entrepreneurs individuals who take up a cause and make it part of the political agenda have largely remained background figures without clear definition in the policymaking literature This book is the first comprehensive and systematic treatment of the concept of policy entrepreneurship providing an important foundation for explaining how policy proposals are initiated considered and adopted Mintrom uses the emergence of school choice in state politics to examine how policy change originates He shows how policy entrepreneurs have been instrumental in placing school choice onto state legislative agendas despite the lack of compelling evidence about its merits and how they use social networks reframe policy issues and attempt to shift the sites of policy debate Blending innovative theory with both qualitative and quantitative investigation Mintrom explains how energetic individuals made school choice a real choice In doing so he changes our broader understanding of how policy is formed **Unproductive School Choice Debates** John Merrifield, Nathan Gray, 2023-05-22 The book explains why we desperately need an Open Education Industry It clearly

defines the term and the confusion about what can should be done to improve schooling outcomes and why over 30 years of efforts to improve schooling outcomes has left all 51 US school systems far short of what is needed to engage all schoolchildren in high value instruction Because of past education failures especially poor basic literacy in economic systems many influential academics and activists have asserted the presence of adequate market forces where key elements of high performing markets are absent and have become pre occupied with discussion of and development of devastating inappropriate generalizations about findings from studies of narrowly targeted restriction laden expansions of access to alternatives to traditional public schools The book compares those to transformational school choice expansions and describes key steps towards the inertia that threatens the future of America as a prosperous and free republic School Choice In The Real World Robert Maranto, 2018-04-27 This book presents the first published accounts and evaluations of the first free market in education in the U S Arizona charter schools The charter school is fast becoming one of the most significant attempts at public education reform in this country Over 1100 charter schools operate in twenty seven states with several hundred more to be added in the next two years School Choice in the Real World looks at the charter school movement through a highly focused lens it examines charter schools in Arizona which currently account for nearly one quarter of all charter schools Using this state as a case study the editors examine the experiences of actual charter school operators social scientific analysis policy discussions and criticism and forecasting for the future School choice is the most talked about reform of American public education yet writings about choice remain highly speculative because no state has adopted a free market approach to education until now The charter school is fast becoming one of the most significant attempts at public education reform in this country Over 1100 charter schools operate in twenty seven states with several hundred more to be added in the next two years School Choice in the Real World looks at the charter school movement through a highly focused lens it examines charter schools in Arizona which currently account for nearly one quarter of all charter schools Since 1994 Arizona has implemented a charter school law with the lowest barriers to entry in the nation As a result Arizona has more than 200 charter school campuses Some districts have even lost more than 10% of their students to charter schools Using the state of Arizona as a case study the editors examine the experiences of actual charter school operators social scientific analysis policy discussions and criticism and forecasting for the future The editors bring together academics policy makers and practitioners and they explain and evaluate how school choice works in the real world *The Globalisation of School Choice?* Martin Forsey, Scott Davies, Geoffrey Walford, 2008-05-12 Which school should I choose for my child For many parents this question is one of the most important of their lives School choice is a slogan being voiced around the globe conjuring images of a marketplace with an abundance of educational options Those promoting educational choice also promise equality social advantage autonomy and self expression to families But what does this globalisation of school choice actually look like on the ground This collection brings together educationalists anthropologists and sociologists

who use a rich array of empirical data to understand the complex realities of school choice across a range of political and social settings in Argentina Australia Canada China England India Israel Japan Singapore Tanzania and the United States Together they show that while the language of school choice has spread globally it has done so unevenly across and within nations and is always interpreted through local social and historical contexts Neo liberal policy initiatives are re shaping education systems in many nations but in complex and varied ways This collection shows that rather than eliminating equity concerns they re embed them within new frameworks of choice and accountability This is an important book for those interested in comparative education as well as the sociology and politics of schooling

School Choice in China Wu Xiaoxin,2013-10-15 School Choice in China explores the major characteristics of schooling options in China highlighting how largely middle class parents exploit their cultural economic and social capital for their children s admission into choice schools It highlights how payments such as choice fees donations prize winning certificates and awards as well as the use of guanxi result in Chinese school choice as a parent driven bottom up movement The author also explores how schools and local governments cash in on the school choice fever in order to obtain significant economic returns leading to policies that accommodate the needs of mostly middle class families He argues that although this system

seems to create winners among the parties involved it exacerbates the educational inequality that already exists in Chinese society Chapters include Positional competition for cultural capital Exploitation of social capital Economics of school choice Class reproduction through parental choice This book is not simply a detailed analysis of Chinese school choice practices but also a study of the competitive middle class search for advantage for their children As such it will be beneficial to undergraduates postgraduates education professionals policy makers and anyone with an interest in education sociology social policy and the rise and future of China
