Selected Writings Of Richard McKeon Vol 1 Philosophy Science And Culture:

Selected Writings of Richard McKeon Richard P. McKeon, 1998-03-28 Richard McKeon 1900 1985 taught philosophy at the University of Chicago from 1935 to 1973 and at the time of his death had published eleven books and 158 articles on an extraordinary array of topics and cultures This first volume of an ambitious three volume work covers philosophic theory through McKeon s writings on first philosophy metaphysics and the methods and principles of the sciences Selected Writings of Richard McKeon, Volume Two Richard P. McKeon, 1998 Richard McKeon was a philosopher of extraordinary creativity who brought profoundly original ideas to bear on more standard ways of thinking and learning A classicist medievalist and revolutionary intellectual he fashioned an approach to philosophy as a plural conversation among varied traditions of thought epochs and civilizations This second volume of McKeon s selected works demonstrates his approach to inquiry and practice in culture education and the arts Together the writings in this book show how McKeon reinvented the ancient arts of rhetoric grammar logic and dialectic for the new circumstances of a global culture In essays on creation and criticism for instance rhetoric is distinguished from grammar and shown to be the master art of invention judgment and pluralistic interpretation Writings on themes of culture meanwhile explore the self invention of mankind as justification for the arts the development of the humanities and the organization of the sciences In the closing essays on education and philosophy McKeon considers the implications of his ideas for the future of the liberal arts and higher learning

Recovering Argument Randall Lake, 2018-10-29 This volume presents the best scholarship from the 19th National Communication Association American Forensic Association Conference on Argumentation which took place July 30 August 2 2015 at Cliff Lodge Snowbird Resort in Alta Utah The Alta Conference first held in 1979 is the oldest conference in argumentation studies in the world and biennially brings together a lively group of scholars representing a variety of countries with diverse perspectives on the theory and practice of argument The essays in Recovering Argument invite reflection upon and reconsideration of argumentation s legacy present status and potential roles in social cultural and political life Readers will encounter essays that treat the relationship between argumentation and memory historical approaches to argumentation the vitality of public and interpersonal argument argument s role in leadership discursive and presentational forms of argument and the challenges of difference Readers also will find these topics addressed from a variety of historical social scientific and critical interpretive perspectives

On Knowing Richard P. McKeon, 2017-02-09 As a philosopher Richard McKeon spent his career developing Pragmatism in a new key specifically by tracing the ways in which philosophic problems arise in fields other than philosophy across the natural and social sciences and aesthetics and showed the ways in which any problem pushed back to its beginning or taken to its end is a philosophic problem The roots of this book On Knowing The Social Sciences are traced to McKeon s classes where he blended philosophy with physics ethics politics history and aesthetics This volume the second in a series leaves behind natural science themes to embrace freedom

power and history which McKeon argues lay out the whole field of human action The authors McKeon considers Hobbes Machiavelli Spinoza Kant and J S Mill show brilliantly how philosophic methods work in action via analyses that do not merely reduce or deconstruct meaning but enhance those texts by reconnecting them to the active history of philosophy and to problems of ethics politics and history The waves of modernism and post modernism are receding Philosophic pluralism is now available fully formulated in McKeon s work spreading from the humanities to the social sciences *Understanding James, Understanding Modernism* David H. Evans, 2017-04-20 Psychologist philosopher teacher writer William James stood closer than any other thinker to the center of the confluence of intellectual and artistic forces that defined the culture of modernism The outstanding feature of this volume lies in its intent to investigate James s influence on both American and International Modernism It provides on the one hand a multifaceted introduction to students of history philosophy and culture and on the other a compendium of some of the most up to date thinking on this central figure James s first book *Principles of Psychology* 1890 immediately established James as the leading psychologist of his time at a moment in history when psychology seemed to offer the promise of finding some definitive answers to eternal philosophical conundra James s innovations would register a clear effect on much modernist art most evidently in the stylistic prose experiments of James Joyce Virginia Woolf and their imitators James s tentative skepticism concerning the concept of consciousness as such and the post Cartesian ego that was its foundation also anticipates the questioning of the subject that would be the theme of much modern and indeed postmodern thought The contributors to this volume explore James s most essential texts as well as his influence on contemporary writers artists and thinkers The final section is a glossary of James s key terms with entries written by leading experts *Philosophy of Technology and Engineering Sciences* , 2009-11-27 The Handbook *Philosophy of Technology and Engineering Sciences* addresses numerous issues in the emerging field of the philosophy of those sciences that are involved in the technological process of designing developing and making of new technical artifacts and systems These issues include the nature of design of technological knowledge and of technical artifacts as well as the toolbox of engineers Most of these have thus far not been analyzed in general philosophy of science which has traditionally but inadequately regarded technology as mere applied science and focused on physics biology mathematics and the social sciences First comprehensive philosophical handbook on technology and the engineering sciences Unparalleled in scope including explorative articles In depth discussion of technical artifacts and their ontology Provides extensive analysis of the nature of engineering design Focuses in detail on the role of models in technology *Idealism, Metaphysics and Community* William Sweet, 2017-07-12 This title was first published in 2001 *Idealism Metaphysics and Community* examines the place of idealism in contemporary philosophy and its relation to problems of metaphysics political thought and the study of the history of philosophy Following an extensive introduction by the editor and drawing on the work of the Canadian idealist Leslie Armour the book is divided into three main parts Part 1 focuses on F H Bradley Part 2 examines metaphysical issues and

idealism such as the realism anti realism debate the relation of classical and idealist metaphysics rational psychology time and eternity and the divine Part 3 draws on idealism to address contemporary concerns in ethical theory political philosophy social philosophy and culture and the history of philosophy Presenting new insights into the work of classical and contemporary authors this book provides a better understanding of classical idealism and addresses important areas of contemporary philosophical social and political concern *A Marriage of Philosophy and Music* Erich Welling,2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in *A Marriage of Philosophy and Music* It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline *A Marriage of Philosophy and Music* attempts to create a path in this direction because besides the enjoyment of social culture and personal skills there is enjoyment in being yourself which is a neglected liberal art

Introduction to Cybersemiotics: A Transdisciplinary Perspective Carlos Vidales,Søren Brier,2021-04-14 This book traces the origins and evolution of cybersemiotics beginning with the integration of semiotics into the theoretical framework of cybernetics and information theory The book opens with chapters that situate the roots of cybersemiotics in Peircean semiotics describe the advent of the Information Age and cybernetics and lay out the proposition that notions of system communication self reference information meaning form autopoiesis and self control are of equal topical interest to semiotics and systems theory Subsequent chapters introduce a cybersemiotic viewpoint on the capacity of arts and other practices for knowing This suggests pathways for developing Practice as Research and practice led research and prompts the reader to view this new configuration in cybersemiotic terms Other contributors discuss cultural and perceptual shifts that lead to interaction with hybrid environments such as Alexa The relationship of storytelling and cybersemiotics is covered at chapter length and another chapter describes an individual collectivity dialectics in which the latter Commind constrains the former interactants but the former fuels the latter The concluding chapter begins with the observation that digital technologies have infiltrated every corner of the metropolis homes workplaces and places of leisure to the extent that cities and bodies have transformed into interconnected interfaces The book challenges the reader to participate in a broader discussion of the potential limitations alternatives and criticisms of cybersemiotics **Reflections on Fieldwork in Morocco** Paul Rabinow,2016-08-05 In this landmark study now

celebrating thirty years in print Paul Rabinow takes as his focus the fieldwork that anthropologists do How valid is the process To what extent do the cultural data become artifacts of the interaction between anthropologist and informants Having first published a more standard ethnographic study about Morocco Rabinow here describes a series of encounters with his informants in that study from a French innkeeper clinging to the vestiges of a colonial past to the rural descendants of a seventeenth century saint In a new preface Rabinow considers the thirty year life of this remarkable book and his own distinguished career

Writing and Righting Lyndsey Stonebridge, 2020-11-26 A bold and accessible argument for the moral and political value of literature in rightless times The obvious humanity of books would seem to make literature and human rights natural allies But what is the real connection between literature and human rights In this short polemical book Lyndsey Stonebridge shows how the history of human rights owes much to the creative imagining of writers Yet she argues it is not enough to claim that literature is the empathetic wing of the human rights movement At a time when human rights are so blatantly under attack the writers we need how are the political truth-tellers the bold callers out of easy sympathy and comfortable platitudes

What Is a Person? Christian Smith, 2010-09-15 What is a person This fundamental question is a perennial concern of philosophers and theologians But Christian Smith here argues it also lies at the center of the social scientist's quest to interpret and explain social life In this ambitious book Smith presents a new model for social theory that does justice to the best of our humanistic visions of people life and society Finding much current thinking on personhood to be confusing or misleading Smith finds inspiration in critical realism and personalism Drawing on these ideas he constructs a theory of personhood that forges a middle path between the extremes of positivist science and relativism Smith then builds on the work of Pierre Bourdieu Anthony Giddens and William Sewell to demonstrate the importance of personhood to our understanding of social structures From there he broadens his scope to consider how we can know what is good in personal and social life and what sociology can tell us about human rights and dignity Innovative critical and constructive What Is a Person offers an inspiring vision of a social science committed to pursuing causal explanations interpretive understanding and general knowledge in the service of truth and the moral good

Cross-Cultural Design Pei-Luen Patrick Rau, 2025-07-16 This four volume set LNCS 15782 15785 constitutes the refereed proceedings of the 17th International Conference on Cross Cultural Design CCD 2025 held as part of the 27th International Conference on Human Computer Interaction HCII 2025 in Gothenburg Sweden during June 22-27 2025 The total of 1430 papers and 355 posters included in the HCII 2025 proceedings was carefully reviewed and selected from 7972 submissions The four volumes cover the following topics Part I Cross cultural user experience and design cross cultural emotional and psychological factors in interaction and cross cultural usability and interaction design Part II Artificial intelligence in cultural heritage and creativity cross cultural generative AI and AI applications and sustainable innovation

Part III Cross cultural arts and aesthetics cross cultural social innovation automotive and transportation user experience and cross cultural design and cultural heritage Part IV Digital learning STEM education and AI driven pedagogy smart systems intelligent interaction and user perception and cross cultural health and wellbeing Invention, Copyright, and Digital Writing Martine Courant Rife, 2013-01-31 This is the first empirical mixed methods study of copyright issues that speaks to writing specialists and legal scholars about the complicated intersections of rhetoric technology copyright law and writing for the Internet Martine Courant Rife opens up new conversations about how invention and copyright work together in the composing process for digital writers and how this relationship is central to contemporary issues in composition pedagogy and curriculum In this era of digital writing and publishing composition and legal scholars have identified various problems with writers processes and the law s construction of textual ownership such as issues of appropriation infringement and fair use within academic and online contexts Invention Copyright and Digital Writing unpacks digital writers complex perceptions of copyright revealing how it influences what they choose to write and how it complicates their work Rife uses quantitative and qualitative approaches and focuses on writing as a tool and a technology mediated activity arguing the copyright problem is about not law but invention and the attendant issues of authorship Looking at copyright and writing through a rhetorical lens Rife leverages the tools and history of rhetoric to offer insights into how some of our most ancient concepts inform our understanding of the problems copyright law creates for writers In this innovative study that will be of interest to professional and technical writers scholars and students of writing and rhetoric and legal professionals Rife offers possibilities for future research teaching curriculum design and public advocacy in regard to composition and changing copyright laws Roads to Reconciliation: Conflict and Dialogue in the Twenty-first Century Amy Benson Brown, Karen M. Poremski, 2014-12-18 Unlike other books on conflict resolution that focus on particular places and moments in history this original work attempts to understand the process from many different perspectives and in many different contexts from international political conflicts to racial and religious struggles within one culture to the internal conflicts of individuals struggling with the desire for revenge in the wake of 9 11 Designed as a starting point for meaningful dialogue on the elusive concept of reconciliation the book includes views from Christians and Muslims scholars and politicians and draws on religion psychology cultural studies education theory history and law Selected Writings of Richard McKeon: Culture, education and the arts Richard Peter McKeon, 1998 **The Dialogical Turn** Charles Camic, Hans Joas, 2003-12-09 The discipline of sociology was born and has been recurrently reconstituted in response to the fragmentation of ideas about the social world For two centuries sociologists have sought refuge in synthesis programs designed to integrate multiple perspectives within a unifying framework Yet even as this cause has inspired many of the discipline s major thinkers past and present its objective has proven elusive leaving nearly as many syntheses as synthesizers This volume considers an alternative response that has recently developed within sociology to the crisis of intellectual fragmentation the dialogical turn Rather than decry the

multiplicity of social theories research methods and results this response welcomes a plurality of orientations and approaches as the essential basis for establishing and maintaining productive dialogue Examining this exciting development The Dialogical Turn builds on the ideas of Donald N Levine whose extensive writings on the forms and functions of intellectual dialogue provide the point of departure for twelve original essays Written by an internationally renowned group of scholars these innovative chapters explore the dialogical possibilities for sociology both constructively and critically The contributors assess the role of sociology in the conversation across contemporary academic disciplines exploring the fundamental structural and conceptual reconstructions now taking place in sociology and neighboring fields The Ethics of Biotechnology Gaymon Bennett, 2022-01-26 The essays collected in this volume provide students of ethics with essential tools for making sense of emerging biotechnical capacities and the turbulent power relations these capacities are bringing into the world Unlike previous reference works in bioethics which focus on specific domains of human activity such as genetic research or biomedicine this volume directs students attention to the underlying cultural and institutional forces that shape how biotechnologists approach the world and teaches students how to weigh the ethical significance of these forces This innovative approach to the ethics of biotechnology detailed in the volume s introduction equips students to track the dynamic interplay of biology digital technology and the high tech economy which is remaking the living world today and the human relation to it **A Joyfully Serious Man** Matteo Bortolini, 2025-11-18 The brilliant but turbulent life of a public intellectual who transformed the social sciences Robert Bellah 1927 2013 was one of the most influential social scientists of the twentieth century Trained as a sociologist he crossed disciplinary boundaries in pursuit of a greater comprehension of religion as both a cultural phenomenon and a way to fathom the depths of the human condition A Joyfully Serious Man is the definitive biography of this towering figure in modern intellectual life and a revelatory portrait of a man who led an adventurous yet turbulent life Drawing on Bellah s personal papers as well as in depth interviews with those who knew him Matteo Bortolini tells the story of an extraordinary scholarly career and an eventful and tempestuous life He describes Bellah s exile from the United States during the hysteria of the McCarthy years his crushing personal tragedies and his experiments with sexuality Bellah understood religion as a mysterious human institution that brings together the scattered pieces of individual and collective experiences Bortolini shows how Bellah championed intellectual openness and innovation through his relentless opposition to any notion of secularization as a decline of religion and his ideas about the enduring tensions between individualism and community in American society Based on nearly two decades of research A Joyfully Serious Man is a revelatory chronicle of a leading public intellectual who was both a transformative thinker and a restless passionate seeker
