The Iconography of Humiliation in New Kingdom Egypt Mark D. Janzen, 2024-11-26 This volume analyzes the iconography of bound foreigners on New Kingdom monuments and artifacts to better understand Egyptian perspectives on foreigners and their treatment of prisoners of war Depictions of foreign captives in humiliating or torturous poses are ubiquitous in Egyptian iconography and reflect the celebratory nature of royal ideology in this case by degrading enemies Egyptologists have scrutinized these scenes for details regarding various military matters but existing scholarly literature offers few studies focused on enemy captives and the sheer physical brutality of the depictions of their bindings Janzen examines the bound foreigner motif in New Kingdom sources demonstrating that these prisoners of war played vital roles in Egyptian ideology and religion Their depictions in bizarre or torturous poses served to reinforce ideological underpinnings of pharaoh s right to rule perpetually ritualizing their defeat and or punishment through the presence of this iconography on ceremonial objects used primarily by the king and on temple walls and monuments The

subjugation of foreigners also constituted an important economic function as incorporating prisoners of war into the Egyptian workforce was crucial for economic prosperity and growth in New Kingdom Egypt The volume also explores cross cultural and anthropological parallels placing Egyptian treatment of foreign prisoners in its ancient context The book provides a fascinating study of the subject suitable for scholars and students of Egyptology and ancient history particularly that of New Kingdom Egypt as well as those working on power warfare and violence in the ancient world more broadly Ancient Egyptian Technology and Innovation Ian Shaw,2015-03-02 This book examines the fundamental evidence for many different aspects of change and evolution in ancient Egyptian technology It includes discussion of the wider cognitive and social contexts such as the Egyptian propensity for mental creativity and innovation and the pace of change in Egypt in comparison with other African Mediterranean and Near Eastern states This book draws not only on traditional archaeological and textual sources but also on the results of scientific analyses of ancient materials and on experimental and ethno archaeological information Case studies analyse those aspects of Egyptian society that made it either predisposed or actively opposed to certain types of conservatism or innovation in material culture such as the techniques of stone working medicine mummification and monumental construction The book also includes detailed discussion of the ways in which the practice and development of Egyptian technology interrelated with Late Bronze Age urban society as a whole using the city at Amarna as a case study *Historical Dictionary of Ancient Egyptian Warfare* Robert Morkot,2003 Also included are maps of Egypt and the surrounding regions and a chronological list of rulers and their dates and the dynasties and kingdoms to which they are assigned Egyptologists This reference is aimed primarily at students and those interested in ancient Egypt The arrangement of the book as a dictionary means that it can be used independently as a research tool or in conjunction with other works such as histories or translations of Egyptian texts The user can find concise definitions and descriptions and brief accounts of military actions Through the cross referencing of each entry and in conjunction with the bibliography the reader can pursue wider issues and locate more detailed studies BOOK JACKET **A Bibliography of the Amarna Period** Geoffrey Thorndike Martin,1991 First Published in 1990 Routledge is an imprint of Taylor Francis an informa company

The Social Context of Technological Change Andrew J. Shortland,2016-12-16 The technological capabilities of the ancient world have long fascinated scholars and the general public alike though scholarly debate has often seen material culture not as the development of technology but as a tool for defining chronology and delineating the level of interactions of neighboring societies These fourteen papers arising from a conference held in Oxford in September 2000 take the approach that technology plays a vital role in past socioeconomic systems They cover the Near East and associated areas including Greece Crete Cyprus Anatolia the Levant Mesopotamia and Egypt from the end of the Middle Bronze Age to the Late Bronze Age 1650 1150 BC a period when many technological innovations appear for the first time **Battle in Antiquity** Alan B. Lloyd,2009-12-31 How do fighting men act and feel in battle How do they deal with the trauma of conflict What determines

the outcome of battle Modern research on war notably that of John Keegan and Victor Hanson has posed these questions with a new acuteness In the ancient world warfare was a constant reality Much ancient literature deals with it The present collection of original studies applies the new methods for the first time to the warriors of Greece Rome and Pharaonic Egypt The contributors demonstrate that the battle experience of Homer's heroes and of Alexander's infantrymen compares surprisingly with that of Wellington's redcoats
