[Cognitive Justice in a Global](#)

World Boaventura de Sousa Santos, 2007-10-23 Cognitive Justice in a Global World Prudent Knowledges for a Decent Life is an edited collection that springs from the now dormant debates known as The Science Wars which questioned the nature of scientific theories Learning from the debates about the plurality of truths and opinions editor Boaventura de Sousa Santos has realized an opportunity for strengthening the relations between the natural and social sciences with more epistemological affinities and for opening up new transnational dialogues between scientists and other producers of knowledge This book analyses in detail some of the topics that amount to a set of problematic relations between science and ethics between objectivity and neutrality between the sociological and theoretical condition of production and the limits of scientific rigor between public faith in science and the economic powers that determine scientific priorities and between science and other kinds of knowledge existing in society Maintaining that global social injustice is by and large epistemological injustice and that there can be no global social justice without global cognitive justice Cognitive Justice in a Global World is an important collection for higher level students and researchers in the social sciences philosophy of science and intellectual history

Kohut's Self Psychology for a Fractured World John Hanwell Riker, 2024-05-20 Drawing from Kohut's conceptualisation of self Riker sets out how contemporary America's formulation of persons as autonomous self sufficient individuals is deeply injurious to the development of a vitalizing self structure a condition which lies behind much of the mental illness and social malaise of today's world By carefully attending to Kohut's texts Riker explains the structural functional and dynamic dimensions of Kohut's concept of the self He creatively extends this concept to show how the self can be conceived of as an erotic striving for connectedness beauty and harmony separate from the ego Riker uses this distinction to reveal how social

practices of contemporary American society foster skills and traits to advance the aims of the ego for power and control but tend to suppress the needs of the self to authentically express its ideals and connect with others The book explores the impact that this view can have on clinical practice and concludes by imaginatively constructing an ideal self psychological society using Plato's Republic as a touchstone Informed by self psychology and philosophy this book is essential reading for psychoanalysts psychotherapists and philosophers seeking to revisit and revise constructions of both self and humanity

Plurality and Perspective in Psychoanalysis Adam Rosen-Carole, 2013-02-28 Psychoanalysis is a historical discourse of suffering and healing under conditions of modernity rather than a metaphysical discourse of universal truth and must be so due to the ontological indeterminacy of psychic life Demonstrating this proceeds through the substantiation of two primary theses First pluralism in psychoanalysis thus the perspectival character of psychoanalytic knowing is irreducible Second psychic life is partially pliable to interpretive constitution rather than a self subsistent object domain fully available to third personal objective description Together these theses provide the framework for a radical rethinking of the authority of psychoanalytic knowledge and practice and of the nature of psychoanalytic claims to objectivity Psychoanalytic interpretations are best understood as existentially interrogative they test who and how one might be and if successful to some extent identity formative The validity conditions of psychoanalytic knowledge thus concern the creation discovery of satisfactory forms of practice orienting self narration rather than those regularly operative in the natural sciences However an adequate assessment of psychoanalytic claims requires that the claims of science are given due consideration and the impediments to practice orienting self narration under conditions of late modernity are acknowledged
