**Self-determined Learning Theory** Deirdre K. Mithaug, Martin Agran, James E. Martin, Michael L. Wehmeyer, 2002-12-18

This volume brings together four semi autonomous bodies of research choice self determination self regulation and self management to form a new theory of self engaged learning entitled Self Determined Learning Theory This theory explains why and how students self engage It identifies the factors that give students the sense of control over their learning that is needed for sustained adaptive and ultimately successful learning It begins by describing the characteristics of disengaged learners then describes and illustrates self determined learning theory within both normal and special populations It then examines the theory s predictive value across several special population contexts and then concludes with a critique of the theory s credibility and worth Divided into three sections theory construction theory verification and theory evaluation this volume is organized using the four steps of a previous book Learning to Theorize A Four Step Strategy Step 1 defines a problem of not understanding something as discrepancy between what is known and not known about a circumstance Step 2 searches for information and explanations to change the condition of not knowing into a condition of knowing Step 3 evaluates the credibility and worth of the explanation constructed in Step 2 Step 4 adjusts existing beliefs so they are consistent with the new theory Although aimed primarily at leaders in special education it should also appeal to researchers and scholars in psychology educational psychology and school psychology who are interested in the applications of self regulated learning theory in this case to special populations

*Self-instruction Pedagogy* Dennis E. Mithaug, 2007 This book describes a method of teaching that fosters autonomous learning in all students including students

with disabilities The pedagogy is based on decades of research on strategy instruction as well as on a theory of learning that claims these four conditions promote self determined learning in all learners 1 opportunities to choose expectations for gaining something from a learning challenge 2 strategies that regulate responses to meet those expectations 3 comparisons between results and expectations that provoke additional adjustment in expectations and responses and 4 persistent engagement and adjustment until results match expectations The pedagogy of self instruction described in this book anchors these conditions in everyday instruction so students can learn by adjusting to their own expectations Chapter 1 compares this approach to the teacher directed methods of direct instruction that require teachers to set expectations for students control how students respond to them evaluate the outcomes they produce and then prescribe adjustments students must make to improve Chapter 2 provides evidence that too much of special education instruction reflects this teacher directed approach and as a consequence discourages students from learning how to learn on their own Chapters 3 6 identify four ways to shift learning control from teachers to students and Chapters 7 and 8 identify the obstacles to achieving this instructional shift in special education The appendices of the book provide a bibliography of research on self instruction and direct instruction pedagogies and a validated self assessment that can evaluate the directedness of your teaching

Exceptionality, Volume 11: Academic Strategy Instruction, Part II: Number 1 Edwin S. Ellis, Marcia L. Rock, 2003 This special issue Part II in a series devoted to the topic of strategic instruction explores the issue of traversing the research to practice abyss through the implementation of authentic and effective business development It reminds us that business as usual approaches to teacher in service programs are unlikely to produce meaningful changes in teachers classroom practices In addition this issue offers strategic instructional approaches to facilitate students learning and focuses on structuring instruction to promote self regulated learning Each article raises important questions about existing practices and offers innovative alternatives to improve outcomes for students and teachers

**Teaching Students to Become Self-Determined Learners** Michael Wehmeyer, Yong Zhao, 2020-04-28 Children are born learning machines who want to learn and can organize and manage their own learning Unfortunately today children have little choice over what they do in school and how and when they do it Children prepared in this other determined manner will be poorly equipped to navigate an adult world requiring that they act autonomously and self direct learning to acquire skills in rapidly changing environments In Teaching Students to Become Self Determined Learners Michael Wehmeyer and Yong Zhao explore the how and why of self determined learning which emphasizes autonomy and choice turning over ownership for learning to students by supporting them in engaging in activities that are of personal value to them thus enabling them to act volitionally You ll learn How to promote self determined learning in your classroom or school The importance of autonomy supports competence supports and relatedness supports Conditions that enable self determined learning Teaching strategies for self determined learning Assessment strategies in self determined learning The role of technology in self determined living The practical strategies case studies

**Planning for the Success of Students with IEPs: A Systematic, Supports-Based**

**Approach (The Norton Series on Inclusive Education for Students with Disabilities)** James R. Thompson, 2022-07-12

A great special educator is an expert problem solver. The difficulties that students with individual education plans (IEPs) encounter in general education classrooms are rarely impossible to overcome. What is required to help them succeed is figuring out the individualized supports they need, whether that involves accessing technology, receiving assistance from a peer or adult, or curricular and assignment adaptations. In this comprehensive handbook from The Norton Series on Inclusive Education for Students with Disabilities, James R. Thompson synthesizes the work of a team of experts to provide a roadmap for that problem-solving process. The Systematic Supports Planning Process is structured around three central questions that lead to identifying different types of support: What to teach, curricular adaptations, and how to teach instructional supports. How to promote participation, participation supports. Packed with easy-to-follow guidelines as well as implementation tools and examples, this book is a one-stop reference for planning, delivering, monitoring, and evaluating the supports that students with IEPs require.

**The Positive Psychology of Personal Factors** Dana S. Dunn, Michael L. Wehmeyer, 2022-01-17  
Historically, interventions designed to impact the lives of disabled people were predicated upon deficits-based models of disability. This began to change with the introduction of World Health Organization (WHO) frameworks, particularly the International Classification of Function (ICF), that emphasized that disability could only be understood in the context of interactions among health, environmental factors, and personal factors, and by examining the impact of such factors on a person's activities and participation. The ICF identified personal factors as among the elements of a social-ecological model of disability but did not provide an extensive taxonomy of what constitutes such factors. *The Positive Psychology of Personal Factors* examines personal factors that come from the field of positive psychology and, as such, begins to identify and build strengths-based approaches to promoting the full participation, dignity, and well-being of disabled people. *Promoting Self-determination in Students with Developmental Disabilities* Michael L. Wehmeyer, 2007-04-14. Affordable and complete, this book provides evidence-based strategies to promote self-determination and is the first volume to combine both theory and practice in this area. Because self-determination is a key issue for students with moderate and severe disabilities, this is an ideal resource for middle and secondary special educators, school psychologists, and other school practitioners.

THEORY IN SELF-DETERMINATION Michael L. Wehmeyer, Brian H. Abery, Dennis E. Mithaug, Roger J. Stancliffe, 2003-01-01. This text provides a comprehensive overview of three theoretical perspectives proposed during the past decade addressing the self-determination construct as it applies to the field of special education. The three models were selected primarily because they have focused on defining and categorizing self-determination for all students with disabilities, including students with mental retardation and other cognitive disabilities. These models are intended to provide students and practitioners a solid grounding in self-determination theory. All models have been evaluated among students with cognitive disabilities but are applicable to all students with or without disabilities. The authors research each model and have

applied their own theoretical framework to special education ensuring that interventions to promote skills like problem solving goal setting decision making and self advocacy are in place for all students By reading this text the reader will gain a solid theoretically based foundation in understanding the self determination construct which ultimately supports the development of instructional interventions that enable students with disabilities to become self determined It will be useful as a text in upper undergraduate and graduate courses in special education psychology social work welfare general education vocational rehabilitation and disability studies
