Communities, Development, and Sustainability across Canada John T. Pierce, Ann Dale, 2011-11-01 What is a sustainable community The pressing need to answer this simple question is what prompted John Pierce and Ann Dale to gather the essays in this volume Communities Development and Sustainability across Canada is a timely synthesis of work on how Canadian communities can achieve sustainable development It bridges the gap between theory and praxis and brings together academics policy makers and community activists all of whom have argued for increased local participation in sustainable community development Communities have become the weak link in efforts to refashion relations between the environment and the economy The goal of this book is not simply to describe problems but also to suggest answers not simply to offer theory but also to promote action so that Canadian communities can better achieve sustainable development The twelve essays are organized into four sections Vision Connections Action and Assessing Progress The first and last sections discuss local sustainable development within the context of increasing globalization The second section approaches sustainable development from the perspective of social evolution and urban systems The third section the heart of the book is comprised of three community case studies an assessment of the Pacific salmon fishery and four general discussions of sustainable

development The conclusion reiterates the need to make communities stronger links in sustainable development The message of Communities Development and Sustainability across Canada is clear it is time for communities themselves to act if they are to achieve sustainable development This provocative and persuasive book will prove to be a valuable guide to taking the first steps *Asphalt Nation* Jane Holtz Kay, 2012-06-20 *Asphalt Nation* is a major work of urban studies that examines how the automobile has ravaged America's cities and landscape and how we can fight back The automobile was once seen as a boon to American life eradicating the pollution caused by horses and granting citizens new levels of personal freedom and mobility But it was not long before the servant became the master public spaces were designed to accommodate the automobile at the expense of the pedestrian mass transportation was neglected and the poor unable to afford cars saw their access to jobs and amenities worsen Now even drivers themselves suffer as cars choke the highways and pollution and congestion have replaced the fresh air of the open road Today our world revolves around the car as a nation we spend eight billion hours a year stuck in traffic In *Asphalt Nation* Jane Holtz Kay effectively calls for a revolution to reverse our automobile dependency Citing successful efforts in places from Portland Maine to Portland Oregon Kay shows us that radical change is not impossible by any means She demonstrates that there are economic political architectural and personal solutions that can steer us out of the mess *Asphalt Nation* is essential reading for everyone interested in the history of our relationship with the car and in the prospect of returning to a world of human mobility *The City Cultures Reader* Malcolm Miles, Tim Hall, Iain Borden, 2004 Cities are products of culture and sites where culture is made By presenting the best of classic and contemporary writing on the culture of cities this reader provides an overview of the diverse material on the interface between cities and culture *Capitalism, Democracy, and Ecology* Timothy W. Luke, 1999 The world that was revolutionized by industrialization is being remade by the information revolution But this is mostly a revolution from above increasingly shaped by a new class of technocrats experts and professionals in the service of corporate capitalism Using Marx as a touchstone Timothy W Luke warns that if communities are not to be overwhelmed by new class economic and political agendas then the practice of democracy must be reconstituted on a more populist basis However the galvanizing force for this new more community centered populism will not be the proletariat as Marx predicted nor contemporary militant patriotic groups Rather Luke argues that many groups unified by a concern for ecological justice present the strongest potential opposition to capitalism Wide ranging and lucid *Capitalism Democracy and Ecology* is essential reading in the age of information Challenging and provocative Robert Holsworth coauthor of *Affirmative Action* and *the Stalled Quest for Black Progress* **Overcoming Barriers** Craig Taylor, Elliott Mittler, Le Val Lund, 1998-01-01 Prepared by the Technical Council on Lifeline Earthquake Engineering of ASCE This TCLEE Monograph studies seven large lifeline organizations that have undertaken significant seismic improvement programs In spite of often cited barriers to natural hazards risk reduction these organizations demonstrate a variety of ways to start and sustain risk reduction programs In these economically and

politically robust organizations top level managers and high level inside technical seismic advocates learned from the damage done by past earthquakes to their systems or similar systems and from research and educational programs Then each group developed an overall view of its system s earthquake vulnerabilities and devised adaptable incremental seismic implementation programs

Communicating Environmental Patriotism Anne Marie Todd,2013-06-07 Environmental patriotism the belief that the national environment defines a country s greatness is a significant strand in twentieth century American environmentalism This book is the first to explore the history of environmental patriotism in America through the intriguing stories of environmental patriots and the rhetoric of their speeches and propaganda The See America First movement began in 1906 with the aim of protecting and promoting the landscapes of the American West In 1908 Gifford Pinchot and President Theodore Roosevelt hosted the White House Conservation Conference to promote the wise use of natural resources for generations of Americans In 1912 Pittsburgh s smoke investigation condemned the effects of coal smoke on the city s environment In World War II a massive propaganda effort mobilized millions of Americans to plant victory gardens to save resources for the war abroad While these may not seem like crucial moments for the American environmental movement this new history of American environmentalism shows that they are linked by patriotism The book offers a provoking critique of environmentalists communication strategies and suggests patriotism as a persuasive hook for new ways to make environmental issues a national priority This original research should be of interest to scholars of environmental communication environmental history American history and environmental philosophy

Technology Choice Kelvin W Willoughby,2019-07-09 This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments

Barry Cullingworth,2017-09-29 The development of alternative forms of energy supply since the mid 1970s has brought with it a range of new issues and concerns ranging from nuclear waste disposal to land use planning for energy efficiency This latest volume in the acclaimed Energy Policy Studies series brings together an interdisciplinary group of researchers to examine the relationship between energy and planning policy with emphasis on urban and regional impacts Like other volumes in the series the articles included focus on the social political and economic dimensions of energy technology resources and use The emphasis on issues of technological scale resource allocation environmental impact and quality and urban and regional studies makes this a unique contribution to the literature

Opp, Lauren C. Heberle, 2016-05-06 Sustainable development is a key issue of concern to urban planners across the globe How it is defined implemented and measured at the local level remains highly contested and subject to a wide range of external cultural political and economic pressures Bringing together leading experts from North America Europe the Middle East and SE Asia this book provides a timely overview of the various methods for understanding and implementing sustainable practices at local levels In doing so they present the wide range of local action alternatives available to planners that may be pursued in spite of the constraints generated by globalization processes and highlight the array of public policy options that could reduce the external pressures shaping the possible local alternatives The book argues that while local planners and local authorities are willing to act many are unaware of the range of options available to them In bringing together these case studies not only diverse in geographic terms but also reflecting very different levels of income general population education cultural norms legal systems and government structures it points out innovations and examples of best practice *Research and the Future of U.S. Agriculture* United States.
