Visscher, R. Coe, 2013-10-08 Internationally there is an increasing trend to publish and feed back information to schools and teachers on their functioning School improvement is often the central goal though accountability and the promotion of parental student school choice also play an important role Practical initiatives and research in this field have often failed to recognize the full complexity of improving schools through school performance feedback Relevant questions are for example to what extent the information fed back to schools is valued and understood by them the school performance feedback enables appropriate diagnosis and remediation to take place in schools the use of the feedback generates conflicts and tensions for teachers and administrators the features of the implementation process and school organization influence the utilization of school performance feedback systems schools do actually improve as a result of performance feedback and the feedback systems have unintended effects This book fills the gap by including a thorough conceptualization of school feedback as a performance enhancing mechanism and the prerequisites for utilizing this information in schools a typology of school performance indicators a review of the research on the impact of feeding back performance information to individuals and to organizations evidence on the process problems and impact of school performance feedback from an international variety of contexts Australia the Netherlands United Kingdom USA and reflections on these experiences within the theoretical framework leading to recommended strategies for school improvement through performance feedback **OECD Reviews of Evaluation and Assessment in Education: Northern Ireland, United Kingdom** Shewbridge Claire, Hulshof Marian, Nusche Deborah, Staehr Lars Stenius, 2014-01-16 This comprehensive review of Northern Ireland s educational evaluation and assessment framework finds a programme that is thoughtfully designed and which stands out internationally

Office for Subject Cataloging Policy, 2012 Education Policy in Ireland Since 1922 Brendan Walsh, 2022-04-18

This book examines educational policy at primary secondary and university level in Ireland from the foundation of the State to the present day. Primarily an attempt to set policy within a historical context, the book draws together compelling research on the evolution of key changes in topics as diverse as the use of corporal punishment, the evolution of skills policy in post primary settings and the development of the universities in the post 1922 period. The book includes detailed analysis of more recent policy initiatives and changes in initial teacher education, curriculum change and special and inclusive education and will be of interest to those working in the various fields, students and the general public. It presents detailed discussions of change in the Irish education system demonstrating how policy initiatives, particularly since the early 1990s, have brought about significant transformation at all levels. In doing so, the book also demonstrates that the origin of change often lay in earlier developments, particularly those of the mid 1960s. Policy development is closely linked to external factors and influences and chapters on academic selection and teachers' recollections of policy, for example, set developments within the wider historical context, employing the views and recollections of teachers so that the influence of change on day to day practice is revealed.
