"*Life Stories of Women Artists, 1550-1800*" Julia K. Dabbs, 2017-07-05 The struggles and achievements of forty six notable women artists of the early modern period as documented by their contemporaries are uniquely brought together in this anthology The life stories presented here are foundational texts for the history of art but since most are found only in rare volumes and few have been translated into English until now they have been generally inaccessible to many scholars Originally published in biographical compendia such as Vasari's *Lives of the Artists* the writings included here document not only the lives of relatively well known women artists such as Artemisia Gentileschi and Sofonisba Anguissola but also those who have languished in obscurity like Anna Waser and Li Yin Each life story is preceded by a brief introduction to the artist as well as to her biographer and the texts themselves are annotated to provide necessary clarification Beyond their documentary value these stories provide fascinating insight as to how men commonly characterized women artists as exceptions to their sex and attempted to explain their presence in the male dominated realm of art The introductory chapter to the book explores this intriguing gender dynamic and elucidates some of the strategies and historical context that factored into the composition of these lives The volume includes an appended index to women artists life stories in biographical compendia of the period

Old Age and Agency Emmanuelle Tulle, 2004 This book is about rethinking the ways in which we make sense of social action or agency in later life The contributions in this collection challenge traditional academic approaches to the study of later life which arguably often deny older people agency Social gerontology and the wider society should be more reflexive and rather than contribute to the continued marginalisation of older people should draw attention to the extent to which the latter's actions may be understood within the set of normalising discourses which people have to manage and negotiate as they get old The purpose of this collection is to continue this process by providing philosophical theoretical conceptual and empirical direction for a reflexive social gerontology This book argues that the management of later life has become complex caught as it is within a broad discourse which continues to construct old age as a time of decline and dependency but has shifted the burden of responsibility for the avoidance of decline on individuals
