Encounter, Togetherness Nicholas Cook,2024-04-23 In today s technological and globalised world music remains a basic dimension of society Music Encounter Togetherness outlines a relational approach to music that creates space for both human agency and social relationship Throughout the book author Nicholas Cook puts Euro American musical traditions into dialogue with other world music cultures complementing theory driven approaches with comprehensive case studies ranging from late eighteenth century India to contemporary China and from Debussy s encounter with Javanese music and dance to cross cultural musicking in Australia and in cyberspace Through these examples Cook examines how music affords interpersonal relationship and social togetherness and what happens when musicians from different cultures interact Central to the book is the idea of encounter which highlights the dynamic and processual nature of musicking as much in therapy or at home as in the jazz club or concert hall Western musicologists have traditionally thought of music as primarily a repertory

of objects Cook illustrates how thinking of it in processual terms through an expanded idea of performance can make as much sense of Western art music as of other traditions In basing an understanding of music on acts rather than objects and focussing on people and their relationships rather than on the impersonal forces of evolutionary or stylistic histories the book opens up ways of thinking that counter some of the dehumanising aspects of musical thinking and practice in global modernity
